19.2.4 A Peek Inside A Web Malware Exploitation Kit - An Analysis (2023-02-06 23:09)

[1]

26543

Dear blog readers,

I've decided to share with everyone yet another post part of the "an image is worth a

thousand words" blog posts series. Takes you back doesn't it? In this post I've decided to

share with everyone a never released and published before screenshots of a well known web

malware exploitation kit with the idea to showcase the ease of use and easy to implement

client-side exploit vulnerabilities exploitation on a mass scale.

Sample screenshots include:

With basic iFrame injecting scripts making their rounds back in 2008 including their use and

participation in actual crowd-sourced DDoS attack campaigns internationally I've decided to

share with everyone a sample screenshot of a sample iFrame DDoS script that was actually

known to have been involved in a successful DDoS attack against major Iran-based web sites

back in 2008.

Stay tuned!

Who would have thought? A mass SQL injection scanning and remotely exploitable including

fuzzing capabilities built-in IRC-based botnet? I’ve decided to share with everyone some sam-

ple screenshots on the process with the idea to raise everyone’s awareness that what used to

be once a rocket science is today's reality in specific back in 2008 when I originally took these

screenshots.

Sample screenshots include:

19.2.8 A Peek Inside a Milw0rm Syndicating Remote Execution Flaws Exploitable IRC

Scanning Botnet - An Analysis (2023-02-06 23:10)

[1]

Who would have thought? An IRC based botnet that's directly syndicating remotely

exploitable flaws and actually scanning for them using an IRC based bothet? Takes you back

doesn't it? This has been a daily practice since practically 2008 and I've decided to share

some sample screenshots of the process in action.

Sample screenshots include:

I can trust Green AV to protect my PC. I know that creating realy good antivirus - is a tough a challenge, and Green AV Team did it.
Anne Tartari
34 years
teacher, housewife
LA
I think the Environmental program was maybe the strongest reason. There are many antiviruses, and they all are great i suppose. But I share the idea of environmental care and try to support it whatever it is. It looks simple - just 2 dollars, but it's a good new start!

You need this program because it's unique, effective and able to compete with many well known large software companies. It certainly should be installed on your PC - and you will forget about Spyware and Adware wreckers. This is the best protection software of today among other existing, so use free scan.
About 92% of all PCs are infected with threats that can't be identified by most security programs.
Nobody's safe today! Who can say for sure that his PC is notinfected?
The latest researches prove that 92% of all home PCs are under the threat of infection, the main source of which is still the Internet. The vast majority of Internet users fall for the bait of various trading companies and commercial websites which make large-scale distribution of viruses. Usually, these viruses get to inexperienced users through "free-of-charge" software products.
So, what is Spyware?
This is malevolent software whose aim is to supervise your actions when you are on-line.
As soon as it is noticed that you are Internet amateur who likes to browse boundless open spaces of the Internet, you will immediately receive a huge heap of different information (Commercials, Popups and just Spam) from inside of your PC!
Spyware may harm your PC efficiency and slow the speed of transfer into the Internet.
They penetrate into your PC from websites you visit, spam, even with hidden additions of license programs you had installed. The place of infection always remains not defined. Some Antivirus or Firewall programs cannot find it at all.
Why choose Antivirus 2009 Protection?
Antivirus 2009 Protection is a leading program worldwide:
This unique program won an award for being first Firewall-like protection.

What is eKerberos?
eKerberos is a sophisticated but easy to use software that utilises active protection strategy to eliminate security threats that common Antivirus programs miss.
Overview
Purchase
Updates
Download
Features
Support
Why is eKerberos better then standard antivirus programs?
Anti -virus & -spyware programs use their database to search for mailitious code on your PC. Hackers know that and change the code of their Trojan-horses on a hourly basis making the code-check method obsolete. eKerberos algorithm monitors the activity of all programs that are installed on your PC and prevents any dangerous actions. Trojan horses and spyware programs have a common behaviour that differs them from safe software. eKerberos detects attempts to perform malicious actions, blocks them and performs a fuzzy search to find a match and securely cure your PC.
What threats does eKerberos protect from?
Keyloggers - these programs were intended to steal business related information by recording all the keystrokes you make on your keyboard. Right now keyloggers are mostly used to record the data that you enter in web-forms (passwords, personal details, credit-card information e.t.c.) and misuse it. Keyloggers are often installed by your family members and colleagues to spy on you. eKerberos monitors your system to prevent such activity and clears your system. Data theft - some Trojan horses search for specific files containing the information they need and send them to the owner of the virus. There is a small number of hosting centers where such data-storage can be hosted, they are mainly located in China and are all included in our database. eKerberos checks your outgoing traffic and prevents connections to dangerous addresses. Direct attacks - a lot of worms are always searching for open ports to break into PCs directly. eKerberos monitors your ports and defends them against intruders. Launches of malicious software - viruses and Trojan-horses often hide their code in standard programs like Internet explorer and execute malicious code. eKerberos instantly blocks the execution tracks the infected partitions of the files and cures them.

WHAT IS SYSTEM SECURITY?
System Security is your comprehensive, all-in-one security solution guarding your system against spyware intrusions, annoying adware, identity theft, and all kinds of malware brooding on the net today. Combining advanced removal capabilities with state-of-the-art monitoring and protection modules, System Security is the only security software you need for your home PC. Equally trusted by companies and end users, System Security is your answer to today's security issues.
HOW SYSTEM SECURITY CAN HELP YOU?
With System Security you have your system cleaned from possible malware infections, protected against current intrusions and robustly secured against future security alerts. Combining outstanding cleaning capabilities with an extensive, constantly expanding database of adware and malware types and a sophisticated, highly intelligent detection module, System Security has everything to become your comprehensive home use security solution in the modern world.
System Security's technology guards you against known, documented dangers and emerging, previously unknown types. Its real-time monitor detects and wards off malware attacks and hacking attempts while the removal module uses the huge spyware database to clean your system from any kind of infection.
IS SPYWARE REALLY DANGEROUS?
Spyware is today's most talked about security issue taking many forms from relatively 'harmless' spam scripts which flood your computer with ad popups and unsolicited emails to serious virus-like programs which steal your private information like passwords and credit card details.

XP antivirus is designed to provide you with the highest level of protection against malicious spyware and malware including keyloggers, hijackers and downloaders.
XP antivirus technology protects you from both known and emerging threat variants and gives you real-time protection for your computer with our advanced XP antivirus Guard real-time monitor.
Keep your computer free from trojans, spyware, adware, worms, keyloggers, rootkits, dialers and other malicious programs!
Why spyware is dangerous?
Spyware is the most prevalent threat to online computer privacy and security.It is installed on your computer through websites, spam and as hidden additions to legitimate programs you install.
Spyware brings lots of damage in the sense of data confidentiality. Spyware programs register every user step, both inside the system and in the Internet. All information is delivered to the malefactor who collects data in his, not your, interest!

Antivirus +
95%
OF ALL HOME PC'S ARE INFECTED WITH SPYWARE, ADWARE TROJANS AND KEYLOGGERS!
72% of all spyware is not detected by the major Anti-virus programs. Only a purposely built spyware removal tool such as Antivirus + can!
Antivirus + features:
Spyware removal - detects and removes spyware programs and trojan horses installed on your PC.
Homepage Monitor Tool - browser Hijackers, belonging to the family of spyware and adware, are capable of taking control over your homepage and other favorite pages, and set an unknown website as your homepage.
System clean-up - eliminates the traces of your system activities.
Disc clean-up - securely destroys all the data on your old hard disc.
Quarantine - The infected files that cannot be fixed or deleted are moved to a quarantine folder and displayed on the Quarantine pane of AntiVirus.
User-friendly Wizard Mode - the Quick Scan Wizard will help you run a scan in the basic scan modes.
Autorun Tool - if you want to know what applications run automatically on your system after Windows boots,
Open Ports Tool - without a protective application, your system is defenseless and becomes highly vulnerable to Trojan programs.

Basic symptoms of spyware infection

*If the answer to one of these questions is "Yes", then you are probably infected.
- Your computer has slowed down
- Your Internet connection speed has decreased
- You have downloaded music or software from the Web
- You get popups and annoying ads when you're online or sometimes even offline
- Your default home page has been changed to the one you didn't ask for
- You have an extra toolbar installed, and you don't know where it came from
- You receive more spam emails than ever

What is spyware?

Spyware, like a virus, is a malicious software planted on your PC by a third party in order to secretly monitor your online activity. Once your browsing habits are analyzed, you are flooded with endless Commercials, Popups and Spam from inside your PC! Spyware also dramatically slows down your computer and Internet connection speeds. Spyware collects your private information and steals your identity, passwords, credit card details and other financial data.

Spyware in the news

MacNewsWorld: "Spyware is evolving into a monster that might soon become more vicious than e-mail spam and virus attacks combined."

TheRegister: "73,000 Trojan horse 61,000 system monitoring programs and 2.3 million adware programs in a scan of only 420,000 PCs..."

Buy Now | Features | Support | Testimonials | Company

Spyware and Spam are the world's leading threats to your computer's security today. After just five minutes surfing only a few pages on the internet, you may have unknowingly downloaded more than 10 spyware applications that run and exploit your computer. Sending and receiving email makes your computer just as vulnerable to annoying and malicious spam.

Spyware Scan

Scans your entire system for infections using our exclusive threat database that gets updated every single hour. Scanning is an easy 3-step process by the end of which your system will be clean of All spyware dangers.

Spywall Live Monitoring

Brand-new real-time monitor for any kind of spyware or adware attacks attempted on your machine. After you clean your system, © Spywall will keep onwatching your back. You'll never have to worry about spyware again.

Spam Filter

This real-time filtering program monitors and blocks all incoming spam,keeping your inbox clean of annoying (and sometimes dangerous) messages.

Popup Blocker

STOP

Being automatically integrated into your browser, it will make you forget about commercial pop-ups sooner than you can imagine!

What is Spyware ?

Spyware (e.g. virus) is malicious software planted on your PC by a third party in order to secretly monitor what you do online. Once your browsing habits are analyzed, you are flooded with endless Commercials, Pop-ups and Spam from inside your PC! Spyware dramatically slows down your computer and Internet connection speed!

Spyware collects your private information and steals your identity, passwords, credit card details and other financial data!

Virus Shield 2009

Powerful and efficient internet antivirus suite

- Protection against virus threats
- Intelligent protection against spyware and malware
- Protection for ICQ and IM clients
- Low CPU load

Download Now

Internet Threats

Online indication of virus activity

Alert Level: Medium

Protect your PC Now

Free Online Scanner

Click "Scan your PC", and you'll see the advantages of this product immediately.

Scan your PC

It is simple, fast and FREE.

Features

- Fast automated updates
- Real-time protection against malicious and suspicious software
- Advanced protection against spyware and adware.
- Real-time protection against security threats when using ICQ and IM clients
- Self-protection from being modified, stopped or even uninstalled by another application
- Low CPU load
- Compatible with Windows XP, Windows Vista
- Free support 24/7 in touch.

2009 Best AntiMalware/Adware removal efficiency.

The most efficient software for malware, adware and spyware removal and further protection of your PC.

What is Spyware?
Spyware, like a virus, is a malicious software planted on your PC by a third party in order to secretly monitor what you do online.
Once your browsing habits are analyzed, you are flooded with endless Commercials, Popups and Spam from inside your PC!
Spyware also dramatically slows down your computer and Internet connection speeds.
Spyware collects your private information and steals your identity, passwords, credit card details and other
START FREE SCAN
Basic signs of Spyware infection
*If the answer to one of these questions is "Yes", then you are probably infected.
1. Your computer has slowed down
2. Your Internet connection speed has decreased
3. You have downloaded music or software from the Web
4. You get popups and annoying ads when you're online or sometimes even offline
5. Your default home page has been changed to the one you didn't ask for
6. You have an extra toolbar installed, and you don't know where it came from
7. You receive more spam emails than ever

Takes you back doesn't it? What used to be a daily reality back in 2008 namely the use of

iFrame injected scripts on major Web properties basically forwarding the redirecting

legitimate traffic to client-side exploits serving web malware exploitation kits is still a valid

practice in today's modern and sophisticated cybercrime ecosystem.

Stay tuned!

19.2.11 A Peek Inside a Google AdSense Rogue and Bogus Advertisement Campaign

Impersonating Legitimate Software - An Analysis (2023-02-06 23:11)

[1]

26599

As I've recently came across several mainstream news articles on the use of Google AdSense

to serve malware I've decided to share several screenshots circa 2008 which basically

demonstrate the process.

Sample screenshots include:

19.2.12 Happy Holidays From The (Not) Republic of Bulgaria - An Analysis - Part

Three (2023-02-07 23:38)

[1]

26601

How do you differentiate a gypsy between his mother – with all due respect to all the gypsies

out there sticking to their families and mothers? [2]Yavor Kolev is the answer.

THE FUTURE OF U.S INTELLIGENCE COMMUNITY AND INTELLIGENCE GATHERING

Welcome to Dancho Danchev's Dark Web Onion - "The Future of U.S Intelligence Community and Intelligence Gathering 2.0" - Proprietary and Community-Driven Single-Page Summary Proactively Offering General Security and Tailored Access Operations Recommendation Advice Including Proprietary access to OSINT Data on Key Individuals and Communities-Of-Notice Within the Security Industry Including Various Key Members of the Russian and Eastern European Cybercrime Underground Obtained Using OSINT (Open Source Intelligence) Techniques and Methodologies Including Technical Collection Using Public Sources Courtesy of the Project Operator

Project Operator: Dancho Danchev | Email: dancho.danchev@hush.com | Donate BitCoin: 1H74hr6hAk6v596DbhsueQgxq9eVgNqZv5

Dear Dark Web Onion visitor,

This is Dancho Danchev (http://ddanchev.blogspot.com) where you might know me and my research circa 2005-2020 from my Clearnet personal blog an ex-hacker from Bulgaria during the infraumous hacker spree circa the 90's today's leading expert in the field of cybercrime research and threat intelligence gathering currently running one of the security industry's leading security publications which has already receive 5.6M page views since December, 2005 when I originally launched it while I was busy working on https://astalavista.com as a Managing Director where I produced the following high-quality newsletter - https://packetstormsecurity.com/groups/astalavista.

The primary reason for taking to time an effort and work on this Dark Web Onion is to properly present one of the Dark Web largest and most popular cybercrime research and threat intelligence gathering including Intelligence Community 2.0 type of project to thousands of Dark Web users potentially communicating a vast portion of my research with a new set of folks who might be interested in digging deeper into the world of cybercrime and who's behind it including to actually land a career position as cybercrime researchers or U.S Intelligence Community intelligence analysts.

The project aims to provide in-depth and never-released before technical and personally identifiable information on some of the Web's primary and most important cybercriminals internationally including an in-depth overview of all the currency active U.K'S GCHQ and NSA cyber surveillance and cyber intelligence programs and how they can work better including how you can protect yourself from them including an in-depth discussion on various Intelligence Community 2.0 scenario building methodologies which could easily undermine the current state of the security industry including in-depth dossiers on some of the key individuals behind the U.S and international security industry with the idea to present a picture where Tailored Access and credibility operations can take place and possibly propose actual Tailored Access Operations including methods and techniques to protect yourself from such type of attacks.

Keywords: Dark Web, Dark Web Onion, Hacking, Hacker, Hackers, Dancho Danchev, Intelligence, Intelligence Studies, Intelligence Community, NSA, GCHQ, Cyber Intelligence, Malicious Software, Malware, Cyber Surveillance, Eavesdropping, Wiretapping, Top Secret, Classified, Top Secret Program, Classified Program, Cybercrime, Data Mining, Big Data, Cybercrime Research, Threat Intelligence, Security Industry, Information Security, Information Security Industry, Computer Security, Computer Hacking, Network Security, Network Hacking, OSINT, Russia, Iran, Russian Hackers, Iranian Hackers, Russian Cybercriminal, Cybercrime Forum, Cybercrime Forum Community, Astalavista, Astalavista box.sk, Box.sk, Box.sk Network, Cracks, Serials, Keygens, Key Generators, Hacker Search Engine, Cracks Search Engine, Serials Search Engine, Threat Intelligence, Cybercrime Research, Malware, Malicious Software, Botnet, Botnets, Reverse Engineering

19.2.14 New Permanent and Daily Updated Official Dark Web Onion (2023-02-13 13:11)

[1]

Dear blog readers,

I've decided to share with everyone my new and permanent Dark Web Onion URL

([2]http://3hqc6vio6qqmbzuev5xanurcuhgwnnpgk3so6y25bjgzmgqcxumkzp
on) where I

intend to issue daily updates where I urge you to bookmark it and visit it on a daily basis in

order to grab the latest content.

Stay tuned!

19.2.15 Who is Dancho Danchev? - Part Two (2023-02-13 13:11)

[1]

26628

Hello everyone,

This is Dancho and I would like to welcome you to my official "I'm now officially back" blog

post detailing some of my current future and upcoming projects including a brief introduction

to who I am to those unfamiliar with my research activities throughout the years where you

can freely grab a E-Book copy of my blog in a full offline fashion from [2]here.

My name is Dancho Danchev I'm a 38 years old security blogger OSINT analyst and threat intel-

ligence analyst from Bulgaria. I'm currently running one of the security industry's most popular

security publications which is my personal blog - Dancho Danchev's Blog - Mind Streams of In-

formation Security Knowlwedge. I've been running my publication since December, 2005 and

throughout the years I had an overage of 7,000 RSS feed subscribers including 5.6M page views

throughout the years making my blog an extremely important switchboard to the world of se-

curity blogging OSINT research and analysis threat intelligence analysis and most importantly

cybercrime fighting research and analysis.

[3]

26629

I'm also acting as a DNS Threat Reseaarcher at WhoisXML API.

It's been a while since I've last posted a quality video on YouTube and I've decided that this

is going to be a pretty long and decent introduction into what I've been up to online since the

90’s up to present day where I’m an internationally recognized cybercrime researcher security

blogger and threat intelligence analyst. In this rather long video I’ll walk you through my

experience as a hacker enthusiast during the 90’s up to present day and I’ll also discuss in-

depth a variety of personal projects including to offer a general discussion and overview on a

variety of key topics that are currently active within the security industry including my personal

career such as for instance.

Among my key accomplishments include my "lawful surveillance" and "lawful interceprtion"

experience as teenage hacker the production of the popular Astalavista Security Newsletter

circa 2003-2006 including the "take-down" of the Koobface botnet [MP3] including a participa-

tion in Top Secret GCHQ program called "Lovely Horse" including regular appearance in major

news publications for interview and expert opinion including Techmeme, ZDNet, CNN, PCWorld,

26630

SCMagazine, TheRegister, NYTimes, CNET, ComputerWorld, H+Magazine and regular security

and research presentation appearance at major security events at GCHQ, Interpol, InfoSec

Europe, RSA Europe and CyberCamp.

I’m an internationally recognized expert in the field of cybercrime fighting and threat intel-

ligence gathering having actively pioneered my own methodlogy for processing threat intel-

ligence which leads me to a successful set of hundreas of high-quality anaysis and research

articles published at the industry's leading threat intelligence blog - ZDNet's Zero Day, Dancho

Danchev's Mind Streams of Information Security Knowledge and Webroot's Threat Blog with

his research featured in Techmeme, ZDNet, CNN, PCWorld, SCMagazine, TheRegister, NYTimes,

CNET, ComputerWorld, H+Magazine currently producing threat intelligence at the industry's

leading threat intelligence blog - Dancho Danchev's - Mind Streams of Information Security

Knowledge.

With my research featured at RSA Europe, CyberCamp, InfoSec, GCHQ and Interpol I continue

to actively produce threat intelligence at the industry's leading threat intelligence blog - Dan-

cho Danchev's - Mind Streams of Information Security Knowledge publishing a diverse set of

hundreds of high-quality research analysis detailing the malicious and fraudulent activities at

nation-state and malicious actors across the globe.

In the past I've been a member of:

* A Member to WarIndustries (http://warindustries.com)

In this upcoming series of blog posts I'll discuss in-depth a variety of personal projects and

current and ongoing both real-time current and historical research and analysis activities in

the following categories such as for instance:

- My Dark Web Onion

- My Uncle George Law Enforcement and OSINT Enrichment Operation

- My Cybercrime Forum Data Set

- My Unit-123.org E-Shop for Intelligence Deliverables Project

- My Offensive Warfare 2.0 Threat Intelligence Clearing House Project

- My Disruptive Individual's Threat Intelligence Feed

- My Current work as a DNS Threat Researcher with WhoisXML API

- How I ended up in Snowden's Archive?a

- How I ended up on Wikileaks?

- How I made it into several comparative academic studies on the quality of sharing threat

intelligence and cybercrime research information?

26632

- How come I'm the only one listed as a competitor in Jeffrey Carr's Taia Global Competitors

Slide?

- What's it's like to run the infamous Astalavista.com portal back in 2003-2006 where I was

acting as a Managing Director?

- What it's like to get the privilege to work as a security blogger at ZDNet's Zero Day blog for

four years?

- What's it's like to work as a security blogger with Webroot for two years?

- How I ended up and spend the last couple of years doing OSINT on the bad guys?

- How I ended up having a project on the infamous Astalavista.box.sk?

- A brief introduction into some of the latest developments and research that I posted on my

personal blog - Dancho Danchev's Blog - Mind Streams of Information Security Knowledge

- How I ended up having a mobile application?

- How I ended up having a personal memoir?

- How I got busted?

- What it's like to visit the GCHQ?

- What it's like to meet the security industry?

- What it's like to visit RSA Europe 2012?

- What it's like to visit InfoSec 2012?

- What it's like to visit CyberCamp 2016?

- What it's like to get an invitation to visit Canada's Security Service?

- My DIA Needpedia Investment Proposal

- How I ended up discovering a SolarWinds victim?

- How I ended up with a real-time OSINT and cyber attack attribution campaign on the Conti

Ransomware Gang?

- How I ended up almost retiring and offering OSINT and threat intelligence training?

Before I continue and actually present the topics which I'll cover exclusively in this video in-

depth I would like to thank the following individuals with the idea to say big thanks for offering

interest and support for some of my projects where I'm currently doing my best both personally

and professionally to return them the favor:

- Jamie Riden

- Steve Santorelli

- Michal Salat

- John Young

- Paul de Souza

- Harrison Cook

- Ian Cook

- Jeffrey Bardin

- Liran Sorani

26633

- Joe Steward

I also wanted to take the time and effort to dedicate this video introduction to my ex-girfriend

circa the 90's Yordanka Ilieva with whom I worked on the infamous https://astalavista.com

where I had the privilege to work on the infamous Astalavista Security

Group Security Newslet-

ter and received the necessary support and guidance in the context of making this high-quality

security publication happen including everyone in the U.S that I know and have worked with

in the context of fighting cybercrime where I wanted to say big thanks to everyone who ever

approached me and said “keep up the good work” and “keep it coming” in the context of moti-

vating me to continue doing my research and continue to publish high-quality research articles

and proper cyber threat actor attribution research and analysis including the following people:

- Ivan Schmid - for being the coolest boss ever in the world and for welcoming me on board at

one of the Web’s most popular Web site for hackers circa 2003-2006 where I had the privilege

to work as a Managing Director of the portal with my ex-girlfriend circa the 90’s - Yordanka

Ilieva while I was studying in the Netherlands.

- Pascal Mittner - for being the second coolest boss ever in the world who I never really had the

chance to meet personally but was properly doing my work and where I was actually getting

paid to do my work

- Gary Scott - with whom I had the privilege to exchange data and information during the 90’s

on my way to

produce a high-quality newsletter and actually threat intelligence type of brief for ScanSafe at

the time which later on got acquired by Cisco

- Paul Ferguson - for keeping it cool and for keeping in touch an for actually inspiring me to do

my research

into the field of cybercrime research through his daily publications at his personal blog

- Alex Eckelberry - for keeping it cool and corporate and for actually inspiriting me to do my

research in the

field of cybercrime research and for running and maitaining Sunbelt Software which greatly

inspired me to do my research in the field of cybercrime research

- James McQuaid - for being among the few individuals to actually raise awareness on the

existence of the Russian Business Network and for continuing to supply high-profile and high-

value threat intelligence information on a variety of mailing lists

- Jeffrey Bardin - for inviting me to join Treadstone71 as an OSINT Analyst and to actually allow

me to work with him on a several projects where I actually earned the necessary amount to

pay some of my bills and properly invest in several projects including to lauch one of the first

commercial E-Shops for intelligence deliverables

- Jeffrey Carr - for keeping it cool and for expressing his personal gratitude and commenting on

my research in the context of “keeping it coming”.

- Ken Dunham - for keeping it cool and for running a high-profile and popular mailing list for

security trends and actual technical information on current and ongoing cyber attack trends

- Jart Armit - for keeping it cool and for approaching me several times to say “hi” and “keep up

the good work”

- Robert McMillan - for being a true professional and a good friend with whom I had the privilege

and speak and communicate on a numerous occassions

26634

- Rob Lemos - for being a good proffessional and someone that I know and have worked with

and whose work I’ve followed in the past

- Gregg Keizer - for being a true professional and for actually bothering to quote me and refer-

ence me in several articles on numerous occassions

- Gary Warner - for being a true professional and for being always on the front lines of fighting

the bad guys and cybercrime internationally

- Jorge Mieres - for being a true threat intelligence and cybercrime research professional and

for keeping it cool in terms of new research and for offering a unique and in-depth overview

and perspective on new and novel cyber attack trends and threats

- Marcus Sachs - for keeping it cool and for being a true professional whose work I’ve followed

in the past

- Gunter Ollman - for being a true professional and a good friend with whom I actually got the

chance to meet at RSA Europe 2012

The World is small and infinite and we can definitely make it a better place by doing our work

following the basic methodology that an “OSINT conducted today is a tax payer’s buck saved

somewhere”.

I owe everyone a big one and I’m doing my best both personally and professionally to return

the favour. Bare with me.

Stay tuned!

The time has come for me to introduce myself professionally through the prism of the opinion

of my fellow colleagues and friends from the industry.

Here are some sample recommendations which I’ve received from friends colleagues and

partners throughout the years with the idea to illustrate my experience and expertise in the

field such as for instance:

“I have been working in the security space for many years and for a very large part of that

have been following the excellent research work that Dancho has been doing in identifying

cyber criminals and doing complex analysis of highly advanced modern day malware attacks.

Dancho is extremely well known in the security industry for the work he has done and continues

to do. When we had the opportunity of collaborating with Dancho at Webroot, we didn’t hesitate.

Dancho has proven to deliver on a continuous basis for us and his work is simply phenomenal.

I look forward to working with Dancho for many years to come.”

— Jacques Erasmus, was Dancho's client

"Dancho is an expert researcher who I've had the pleasure of working with on several hacker

investigations for Taia Global clients. I consider Dancho one of the best and most insightful

researchers working in InfoSec today."

— Jeffrey Carr, CEO, Taia Global, Inc., managed Dancho indirectly at Non-disclosure agreement

"Dancho Danchev has his pulse on the cyber criminal community. I can think of few people

who have his experience, skills and understanding when it comes to cyber intelligence and

understanding the cyber threat. I cannot recommend Dancho enough."

— Lance Spitzner, President, The Honeynet Project, worked with Dancho at Non-disclosure

agreement

"Dancho is one of those exceedingly rare security professionals with not only an eye for un-

covering the root cause of an attack and the ability to examine it from multiple angles, but

26635

also explain his findings in a way that has a meaningful and direct impact on those tasked with

defending against such attacks. I admire the depth of his analysis and his dogged determina-

tion to track back who the criminal operators are despite the dangers he could be exposed to.

Dancho gets two-thumbs-up from me and I'd hire him in a heart-beat if he ever makes it to the

USA. In the meantime I'll keep on following his research, reading his

blogs and looking forward

to collaborating with him on future cyber crime investigations.”

— Gunter Ollmann, Vice President of Research, Damballa, Inc., was with another company when

working with Dancho at Non-disclosure agreement

“Dancho is an exceptional information security professional; he continually goes the extra mile

for clients and the security community. His knowledge and analysis in core areas as threat

intelligence analysis, cybercrime counter Intelligence and competitive intelligence research is

outstanding. He also manages the most difficult task with ease, that of communicating this in

an understandable and meaningful form for the community. Working with Dancho over several

years has been highly productive, and beneficial.”

— Jart Armin, Editor, HostExploit, was with another company when working with Dancho at

Non-disclosure agreement

“I first knew Dancho when he was fresh out of college but already with a prodigious under-

standing of information security matters. He became one of the experts in the Security Clinic

on ITsecurity.com, a site I founded and was publishing at the time; and he willingly gave free

security help and advice to visitors to the site. Since those days I have watched both his career

and knowledge grow in leaps and bounds until he is now, without any doubt, one of the world’s

leading experts on the shady world of cybercrime.”

— Kevin Townsend, Founder/Editor, ITsecurity.com, worked directly with Dancho at ITsecu-

rity.com

“Dancho is a veritable mine of information, particularly on subjects like the ones he blogs about,

such as spam and malware campaigns and the actors behind them. I am an avid reader of his,

and also have met Dancho at a few conferences that we’ve both attended. I’ve found him

to be extremely friendly, and always ready to explain anything he’s been working on. Were I

organising a conference, I would definitely send him an invite.”

— Jamie Riden, Senior Consultant, NGS Secure, was with another company when working with

Dancho at Non-disclosure agreement

“While rebuilding the site security and fraud team at a leading online web site, threats and rapid

evolution in the online security space necessitated I get up to speed quickly, and with more

than a modicum of depth and breadth of understanding of current trends and risks in the cyber

security realm. After spending considerable time building an information network of the most

germane, relevant, and useful sources, a common thread emerged from the chatter of activity

and updates – “Dancho Danchev”. As I poured over security publications, cyber-security jour-

nals, blogs, and security vendor sites, I continued to see Dancho cited and acknowledged as

the security researcher and expert who “broke the story” or “tipped off users to the nvulnera-

bilities” or “alerted the community to threat vectors” for major events. Dancho has voluntarily

shared critical information on what the crooks are up to and has been an invaluable and much

appreciated resource. Dancho’s passion for his work is reflected in his genuine desire to quash

the “bad guys” activities and share as much actionable information as he possibly can. I highly

recommend Dancho to any organization seeking an top-notch expert and passionate evangelist

of online security practices.”

— Chris Duncan, Director - Customer Operations, CareerBuilder.com, was with another com-

pany when working with Dancho at ZDNet

26636

Here’s a brief interview with me which I gave to the original and upcoming re-launch of the

infamous Astalavista.box.sk project:

Dear Dancho – can you please introduce yourself and the latest Box.sk project? Can you please

elaborate more on your experience in fighting cybercrime including your contributions to the

threat intelligence gathering community and the U.S Security Industry?

My name is Dancho Danchev. I’ve been an independent contractor doing OSINT cybercrime

fighting and threat intelligence gathering for over a decade and I’m currently running one

of the security industry’s leading security publications which is my personal blog where I’ve

established the foundations for an efficient and relevant OSINT and law enforcement method-

ology in terms of fighting and disrupting cybercrime internationally which led me to pursue a

successful career with several high-profile U.S based companies and organizations throughout

the past decade following a successful career as an ex-hacker throughout the 90's. My daily

routine consists of digging deep inside the cyber warfare realm in the context of responding

to and tracking down high-profile nation-state sponsored or targeted malware campaigns and

cybercrime incidents and keeping track of the bad guys as usual with the idea to contribute

to the overall demise of cybercrime internationally and to actually contribute to the U.S Intel-

ligence Community with operational and tactical intelligence including to actively support U.S

Law Enforcement on its way to track down and respond to cybercrime events globally.

My primary motivation for re-lauching a project on the original Astalavista.box.sk is to "show

them how it's done" in the context of reaching out to a broader audience in the context of

offering practical tactical and operational advice in the World of cyber warfare information

warfare operations and to present hardcore and never-published before potentially classified

and sensitive material in the world of the U.S Intelligence Community and U.S Law Enforcement

and to actually find a constructive and relevant way to say "hi" and "we're back" to a loyal base

of users globally and to actually find a way to “keep the spirit” of the Scene the way we know it.

I’ve planned a set of new high-profile projects which I intend to communicate to our audience

to a systematic and periodic basis with the idea to offer an insightful and unique peek inside

the Scene the way we know it.

What are some of the currently running Box.sk projects and what do you have planned for

the future?

We’re currenty running a high-profile and extremely popular WordPress blog including a cyber

security and hacking forum community and we’ve recently launched an extremely popular Call

for Papers and Call for Innovation part of the WHGDG (World Hacker Global Domination Group)

franchise where we’re currently soliciting content in a variery of areas and on a variety of topics

including a recently launched IRC server including an extremely popular search engine for

hackers and security experts including the upcoming launch of our flagship publicly accessible

product called Project Cybertronics VR for Hackers and Security Experts including an upcoming

high-profile YouTube broadcast featuring folks and experts from the security industry and the

Scene.

We’ve also lined up a variety of high-profile and upcoming community-driven and publicly ac-

cessible products and services and we’ll be definitely looking forward to issuing periodic up-

dates on their public and proprietary availability. “If it’s going to be massive it better be good”

in the context of re-surrecting and re-launching the Scene’s and the security industry’s most

popular Web site for hackers and security experts internationally.

Among the key features of the portal include a flagship search engine for hackers and security

experts which can be accesses at – and is currently indexing over 3M web sites for hackers and

security experts.

26637

What do you think about U.S National Security in a post-Snowden world?

I’m a firm believer that building communities around leaked and classified data might not be

the best way to actually communicate its value and actually reach out to a wider audience po-

tentially blowing the whistle on currently active and sensitive and classified cyber surveillance

and cyber intelligence type of programs part of the portfolio of services courtesy of the U.S Intel-

ligence Community. I’m also positive that a new set of copy-cats will eventually emerge trying

to potentially steal operational and tactical know-how from the leaked data potentially setting

the foundations for their own private and proprietary cyber surveillance and cyber intelligence

products.

In terms of U.S National Security in a post-Snowden world I believe that a specific set of inter-

national fan-base or actual clusters of supporters cannot really do much harm besides raising

awareness on the actual state of cyber surveillance and cyber intelligence programs and their

scale and reach internationally and can actually assist in building a more sophisticated internal

security systems in place.

The current state of U.S National Security has to do with a specific set of post 9/11 contractor

base which are truly making an impact globally by launching new companies actually hiring

people to work for them and actually are fully capable of disrupting and undermining today's

modern and sophisticated cybercrime-driven online activity that also includes various cyber

jihad sentiments globally. Case in point would be ISIS which the U.S Cyber Command has

specifically targeted and could be possibly used as the most relevant and recent example of

fraudulent online cyber jihad activity up to present day in the context of a large scale inter-

national campaign which basically attracted the U.S attention which resulted in a variety of

campaigns targeting pro-ISIS infrastructure and its supporters.

How can you best describe your experience in tracking down and monitoring of the Koobface

botnet?

It took me two and a half years of active daily monitoring of the Koobface botnet to actually

come up and properly provide the necessary technical research and analysis behind the actual

working of the botnet and actually allow me to track down and publicly distribute a variety

of personally identifiable information on one of the key members of the group which at some

point resulted in having Facebook's net-space IP block redirected to my personal blog including

to actually have a personal message embedded on tens of thousands of infected hosts globally

personally greeting me for my research into the Koobface botnet. At some point my research

into the group's whereabouts became the primary information source on the group's activities

internationally which resulted in a series of blog posts on the topic and greatly motivated me to

continue my research into the way the botnet worked at the time through the systematic and

daily publication of high-profile and never-published before technical analysis and research on

the botnet's la

What's the current state of the fight against cybercrime globally?

While we're currently observing a lot of newly popping-up vendors and organizations who are

actually good at tracking down and responding to cybercrime incidents and activities it should

be clearly noted that high-profile think-tanks including independent researchers organizations

and vendors who have been tracking down cybercrime incidents and profiling cybercrime activ-

ities for decades should be easily considered a recommended reading in terms of their recently

and historical published research in this area.

It should be also clearly noted that wide-spread cooperation campaigns between the academic

commercial and private sector are already taking place potentially undermining and contribut-

ing to the overall lowering down of cybercrime activity globally.

26638

What should be done in the broader context of fighting cybercrime internationally is a currently

ongoing OSINT and Law Enforcement operation similar to my recently launched crowd-sourced

OSINT and Law Enforcement operation called “Uncle George” including my most recently pub-

lished high-profile and available online for free Cybercrime Forum Data Set for 2019 which you

can download and process and potentially reach out to me in terms of the actual enrichment

and tracking and shutting down process.

How can you best describe the ongoing intersection between law enforcement and the U.S

Intelligence Community in the context of launching offensive lawful surveillance campaigns?

Case in point is the recent take down and hijacking of the primary domain for Encrochat a

proprietary encrypted mobile solution? Do you think Dutch law enforcement basically abused

its technological “know-how” and expertise to target a commercial encrypted mobile solutions

provider?

This is something that’s extremely important in the context of fighting cybercrime but can defi-

nitely raise someone's eyebrows across the World in the context of preventing and responding

to cybercrime and cyber jihad incidents globally in particular the intersection between U.S

Law Enforcement and the U.S Intelligence Community. Case in point is the Dutch Intelligence

Service which is quite experienced in fighting tracking down and actually responding to cyber-

crime and cyber jihad incidents globally which is a great example of the intersection between

law enforcement and a country's Intelligence Agencies globally. Case in point is Encrochat

which is basically a commercial enterprise which was successfully taken offline thanks to a co-

operation between the Dutch Intelligence Service and Law Enforcement internationally which

eventually led to the direct compromise of the primary command and control infrastructure of

the company and the actual interception of ongoing messages and communication.

Do you think that the launch of U.S Cyber Command is a step in the right direction? Do you

think that publicly sharing proprietary malware releases on VirusTotal is an OPSEC violation?

How do you think the U.S Cyber Command can better perform in the context of today's modern

offensive cyber warfare arms race?

Successfully positioning a major U.S based and publicly accessible organization for the purpose

of fighting to and responding to cybercrime and cyber attack incidents is a step in the right

direction. It should be clearly evident that with the U.S Cyber Command looking to expand

and extend its industry outreach campaigns and is actually bothering to share proprietary

releases which can be clearly found in a huge number of public and private malware repositories

thanks to third-party researchers and vendors this is definitely a step in the right direction. In

the broader context of fighting cybercrime and responding to cyber jihad and cyber warfare

campaigns and incidents globally.

You used to work on Astalavista.com one of Box.sk's primary competitors throughout 2003-

2006? What's your impression for running and managing the portal? What really took place

when it got hacked?

I used to run and manage Astalavista.com which was the primary competitor of the original

Astalavista.box.sk throughout 2003-2006 while I was studying in the Netherlands which greatly

helped me make impact internationally and actually helped me pay the bills at the time. My pri-

mary responsibilities were to manage and issue daily updates to the security directory including

the security news section including the production of a highly popular and high-traffic volume

Security Newsletter where I was also responsible for interviewing people from the Scene and

the Security Industry.

My other responsibilities included the overall look of the portal including the introduction of new

sections including to actually manage and run advertising inventory where I was responsible

for bringing more advertisers on board.

26639

Is it true that you're running one of the security industry's most popular security publications?

How did you originally launched the project? What's the current state of the project?

I've been been running my personal Dancho Danchev's Blog since December, 2005 while I was

still working or https://astalavista.com acting as a Managing Director of the portal where I was

busy responsible for the daily updates of the Security Directory including the Security News

section including the introduction of new

What's your attitude towards "4th party collection?

As this has been my primary area of occupation throughout the last couple of years with the re-

sults of my research published at my personal blog I believe that 4th party collection is largely

driven by a specific set of folks and experts who are actually capable of making an impact and

causing widespread damage across the cybercrime ecosystem internationally. Case in point

is my most recently launched Law Enforcement and OSINT operation called "Uncle George"

where I've managed to publicly process approximately 1M web sites from major and leading

online cybercrime-friendly forum communities with the idea to assist U.S Law Enforcement and

the U.S Intelligence Community on its way to enrich and actually process the data set poten-

tially disrupting the cybercrime-friendly forum communities behind the campaign including to

actually track down and prosecute the cybercriminals behind these campaigns.

Do you believe that an over-populated security industry means lower OPSEC for high-profile

operations?

I think that as we're continuing to witness the emergence and the existence of new cybercrime

and OSINT researchers and analysts joining the security industry which could actually make

the fight against cybercrime ever easier in case these researchers get invited into private mail-

ing lists and private invite-only communities. I don't necessarily think that an over-populated

security industry means lower OPSEC for high-profile operations in case everyone involved in

a specific campaign or operation is keeping track of its sources and sources of information.

Who's running the show in 2020? What can best describe a successful "4th party collection"

or virtual SIGINT operation? Who's running the show in terms of fighting cybercrime online?

I'm currently observing the usual deal of research done by high-profile and well-known cyber-

crime researchers and security experts that also includes vendors including a great deal of

research done by novice researchers entering the cybercrime research ecosystem. In terms of

a successful “4th party collection” I can best describe the process as a combination of Technical

Collection OSINT analysis and actual enrichment and actual U.S Law Enforcement and U.S In-

telligence Community outreach where the ultimate goal would be to track down the prosecute

the cybercriminals behind these campaigns.

Is it true that we live in an utopian World where North Korea and Iran-originating cyber attacks

are basically launched by anything but nation-state actors namely Generation Y individuals

who’re online starting to embrace new technologies meaning that “everything’s in order”?

I can confirm an evident trend where the mainstream news media is over-hyping the use of

remote access tools which in reality are good old fashioned trojan horses circa the 90’s in

terms of launching targeted or widespread malicious software serving campaigns. Based on

my research and analysis it should be clearly evident that both North Korea and Iran are lacking

the necessary technical and operational “know-how” to launch or participate in high-profile

campaigns making it easier for these parties to outsource their cyber warfare or malicious

software research and development needs to a third-party which could be for instance Russia.

Do you believe that corrupt and potentially compromised North Korean online agents are actu-

ally doing more harm than good by participation in cyber warfare campaigns using techniques

and methodologies that were common in use throughout the 90's namely trojan horses and

various other lawful surveillance tools?

I'm clearly observing an increase in such type of "rogue agent" type of activity where North

Korea or Iran-based hackers are actually directly undermining the OPSEC of their country's

offensive or defensive cyber warfare operations in terms of actually signaling trends and var-

ious other indicators which could prove crucial in a possible attribution campaign or actual

assessment of a specific country's understanding of offensive and defensive cyber warfare.

Were you surprised that you participated in a Top Secret GCHQ program monitoring hackers

on Twitter called "Lovely Horse"? How do you think you made the list?

This was quite a surprise and it was in fact a privilege and an honor to have made the list with

my old Twitter account where I was busy contributing with research and various other type

of activity announcements on a daily basis while working for my previous empower which is

Webroot. I think I made the list based on my research and it would be definitely a privilege

and an honor to learn more and actually find out more about related Top Secret or Classified

program where I've participated with my research.

What's the current state of your currently ongoing law enforcement and OSINT operation

“Uncle George”?

The current state of my currently ongoing Law Enforcement and OSINT operation called “Uncle

George” is an active cooperation between several researchers who approached me including

a vendor in terms of enriching the actual data set potentially helping me reach out to U.S Law

Enforcement on my way to assist U.S Law Enforcement on its way to track down and prosecute

the cybercriminals behind these campaigns. Users interested in joining my currently ongoing

Law Enforcement and OSINT operation “Uncle George” can do it here.

Stay tuned!

WhoisXMLAPI

The Who Behind Domain, IP & Cyber Threat Intelligence

19.2.16 A Portfolio of Recently Published WhoisXML API White Papers Courtesy of

Me (2023-02-14 13:18)

[1]

Dear blog readers,

I've decided to share with everyone a recently released portfolio of white papers courtesy of

me for [2]WhoisXML API where I'm currently acting as a DNS Threat Researcher.

Sample white papers include:

[3]Exposing a Currently Active Domains Portfolio of Known 419 Scammers and International

Fraudsters - An OSINT Analysis

[4]Exposing a Currently Active Domains Portfolio of Known 419 Scammers and International

Fraudsters - An OSINT Analysis - Part Two

[5]Exposing a Currently Active Domains Portfolio of Known 419 Scammers and International

Fraudsters - An OSINT Analysis - Part Three

[6]Exposing a Currently Active Domains Portfolio of Known to Have Been Used by Cyber Ji-

hadists Internationally - An OSINT Analysis

[7]Exposing a Currently Active Domains Portfolio of Known Cybercrime Gangs and Cybercrimi-

nals Internationally - An OSINT Analysis

[8]Exposing a Currently Active Domains Portfolio of Cybercrime-Friendly Forum Communities

and Associated E-Shops for Stolen and Compromised Credit Card Details - An OSINT Analysis

[9]Exposing a Currently Active Domains Portfolio of Known to Have Been Used by Ransomware

Network Affiliate Based Participants Including Ransomware Gang Affiliates - An OSINT Analysis

[10]Exposing a Currently Active Domains Portfolio of Known to Have Been Used by Ransomware

19.2.17 Exposing Iran's Hacking Scene and Hacking Ecosystem Major Web Site Repo-

sitiories - An OSINT Analysis - Part Two (2023-02-21 17:07)

[1]

26651

Dear blog readers,

I've decided to share with everyone the results of a recent Technical Collection campaign which

aims to collect tools of the trade including personally identifiable

information on Iran based lone

hacker groups including hacking groups.

Related:

- [2]Exposing Iran-based Hackers and Web Site Defacement Group's Personal Web Sites Portfolio

- Direct Technical Collection Download! Grab a Copy Today!

- [3]Exposing Iran-based Hackers and Web Site Defacement Group's Personal Web Sites Portfolio

- Direct Technical Collection Download! Grab a Copy Today! - Part Two

- [4]Exposing Iran's Hacking Scene and Hacking Ecosystem Major Web Site Repositiories - An

OSINT Analysis

- [5]Assessing The Computer Network Operation (CNO) Capabilities of the Islamic Republic of

Iran [RAR]

- [6]A Qualitative and Technical Collection OSINT-Enriched Analysis of the Iranian Hacking Scene

Through the Prism of the Infamous Ashiyane Digital Security Team [RAR]

Sample web sites known to belong to lone Iran based hacker groups including hacker groups

include:

Dear blog readers,

I've recently stumbled upon a pretty interesting and worth mentioning malicious software and

botnet spam and malicious software serving campaign that can be best described as a "PDF

botnet" where the ultimate idea for both propagation and infection is the active utilization of

PDF files which are exclusively hosted on compromised or on purposely malicious and fraudu-

lent rogue and bogus infrastructure.

Sample screenshots include:

19.3.2 Clustering Phishing Campaign's Rogue and Fraudulent and Malicious Hosting

Infrastructure Pointing to Massive IPFS Web 3.0 Hosting Infrastructure Abuse

- An OSINT Analysis (2023-03-04 18:24)

[1]

Dear blog readers,

I've recently stumbled upon a pretty interesting phishing campaign including the actual hosting

infrastructure behind the campaign where I've decided to share my findings with everyone in

particular the fact that the campaign including several other which I'll profile in this post are

currently hosted on Ipfs's Web 3.0 infrastructure.

Sample screenshots include:

19.3.4 Cybercriminals Offer Apple Themed Discounted Products For Sale On Major

Cybercrime Friendly Forum Community – An Analysis (2023-03-18 06:15)

[1]

I’ve recently came across to a currently active underground marketplace forum proposition

that’s basically offering and selling Apple themed products which appear to have been ob-

tained and purchased using fraudulent means. The seller also appears to be using several

techniques to actually safely ship the products basically everywhere and is using another ser-

vice to guarantee the payment and delivery of the products.

26705

Sample screenshots include:

[2]

[3]

26706

[4]

26707

[5]

26708

[6]

26709

[7]

26710

Sample underground forum proposition:

" The product is only original, packed, new! Absolutely the same as in the store, only cheaper!

— Apple products are a priority and are always available at the drop, the prices for it are

fixed and are indicated in the price list below. — We send it anywhere. — In order to protect

ourselves and you, we will work only through the guarantor such as forum escrow "We can

overpower any volume." — The goods pass the customs control without problems, sending

on the left waybills. — Sending goes from my drop, take on SAFE, there is no risk! — When

ordering from $1000, a nice bonus in the form of an additional device! — I always give the

track number! (number to track the parcel via the Internet) — All GSM devices, neverlocked,

*will work with all telecom operators! *Dear Clients! Read carefully all that is written below, here*

all the conditions and nuances [Payment] — The minimum order is from $180. — We work only

through the guarantor escrow of the forum! — Write to the Forum guarantor the application as

indicated in its topic. — After you deposit funds to the guarantor, immediately write to me, we

will process your order. After sending, I give the track number. — Major transactions in priority,

we process them faster and more efficiently. [Delivery] — Delivery by mail DHL or Fedex (we

can consider other companies), anywhere in the world, no longer than 15 days. Usually

days. — The delivery is included in the price of the goods! — Before we write, please read

the topic, you will find answers to many questions. — If you do not answer immediately – do

not panic. we receive high volume of emails and orders. — Subject for feedback, all questions

in the PM! Recently, unscrupulous schoolgirls are thrown on different shit forums and social

networks, impersonating Serbs, therefore, when uploading photos to the forum, watermarks

are automatically applied. Operating since September 2011. Building a good reputation is one

of my values – I will always do my best to surprise and stay reputable. All iPhones are sent

26711

undamaged in their original packages. It takes 2-4 business days for the products to reach any

location within Europe or North America and up to 6 days elsewhere in the World. All of the

iPhones come in stealth packaging, declared as items of lesser value. You don't have to worry

about customs taxes as it will already be PAID for by us. Trusted. Safe. 100 % Satisfaction

guaranteed. "

[6]

26719

exaken
Protected by Watermarkly. Full version doesn't put this mark.

[7]

26720

Sample underground forum marketplace proposition:

"*My team specializes in stealing financial data such as credit cards, bank logs and other finan-*

cial instruments from hacked databases such as e-commerce websites and spam for card data

using email skimming/phishing, SMS and website fake login pages to extract card and bank

information from victims. We use this data to transfer funds to you using western union, Mon-

eyGram, bank transfers and cash app, etc. We use westernunion.com and moneygram.com

to place an order to your pickup info and order using the victim's cc data. We can also do

bank transfers (wire) to any bank globally as we have data from all countries in our logs. This

is fraud and illegal, so anyone wishing to use this service should take precautionary steps or

contact me for essential advice if you're looking to get some easy money. I recommend doing

these transfers only once per account/name as it gives a higher percentage that your accounts

won't be locked afterwards or, ideally, use fake IDs/drop accounts. We sell on multiple dark

net tor marketplaces. You may find us on other marketplaces. "

26728

Sample underground forum market proposition:

"*Identity card / social security card – A passport will only provide an opportunity to enter the*

country, but in order to be considered a fully functioning member of society, documentary

evidence that the person is a resident (or citizen) will be required. Each country has its own

specific forms of identification, but all use a driver's license as their primary ID card. Therefore,

both documents are necessary for those wishing to obtain a new identity. "Birth certificate –

This document is necessary to substantiate your citizenship by birth: to be able to prove the

fact of birth in this country and that the name, date and place of birth correspond to the

new identity. As is the case with real citizens, this is an important document when purchasing

various government services." "Education and qualification documents. The key element of the

new personality is the person's fake general and professional education. These documents help

start a new life – create a completely new backstory with which you can already get a job and

find a community. Among the documents about education, we make diplomas of secondary

education, bachelor's and master's degrees." "Financial documents and services. Creating a

new financial profile is another step towards creating a new personality. Anyone can update

19.3.8 Profiling a Newly Launched E-Shop For Stolen Credit Cards Information – An

Analysis (2023-03-18 11:34)

[1]

I’ve recently came across to a currently active E-Shop for stolen credit cards information that’s

currently syndicating and offering access to a multitude of stolen credit card details courtesy

of various underground marketplace vendors of stolen credit cards information and is currently

offering a pretty interesting and massive portfolio of stolen credit cards information which

everyone can basically purchase.

Sample screenshots include:

HI,
$0.00
NEW SIDE-WIDE UPGRADES
During the last month we have been working hard and past-time to implement the following changes to our server/site infrastructure:
- New payment gateways have been installed and everything has been moved successfully.
- New search functions have been implemented with filters and variations.
- Mobile application UI improved.
- Members T&C have been updated and the ranking system has been changed. Older ratings still remain available for every account.
- Need Anti-DDoS firewall configuration implemented. DDoS attacks mitgrated.

19.3.11 Who Wants to Fuel Independent and High Quality OSINT/Cybercrime and

Threat Intelligence Research? Accepting BitCoin Donations (2023-03-18 21:57)

[1]

26741

Dear blog readers,

Did you already grab a copy of my 2019-2023 "[2]Dancho Danchev's Blog - Mind Streams of

Information Security Knowledge" Ebook which is 1.7GB compilation for free? Did you already

grab a copy of my [3]Twitter 2017-2023 Ebook compilation for free? Did you already grab a

copy of all of my WhoisXML API white papers which I produced during the past year and a

half [4]here? Have you also downloaded my Cybercrime Forum Data Set for 2022 including

a free 256GB compilation of all of my publicly accessible research from 2005 up to 2023 for

free in the form of a [5]torrent? Have you also grabbed a copy of all of my publicly accessible

research from 2005 up to 2023 from [6]here for free? Did you also grab a copy of my memoir

from [7]here including a version in Bulgarian from [8]here? Did you also grab a copy of my 230

pages cyber threat actors compilation from [9]here? Did you also grab a copy of my Maltego

training videos from [10]here? Did you also grab a copy of my latest video presentation at

Cyber Security Talks Bulgaria from [11]here?

After a bit of thinking and personal decision making I've decided to begin soliciting free Bit-

coin donations using address - **15Zvie1j8CjSR52doVSZSjctCDSx3pDjKZ** where every amount

donated will go for me which I'll use to pay my bills including to maintain a decent living in

the form of taking care of my family and folks in terms of expenses and most importantly fuel

growth in the form of my research in the form of securing a decent revenue stream that will

be a personal privilege in the form of receiving it as a donation to keep my research keep and

running on a daily basis as I've done so as of December, 2005 up to present day in March,

2023.

Here's what you can do in order to help me fuel growth into my research on a daily basis and

help me pay the bills and assist me family with bills and expenses including to maintain a

decent living in the form of being a noteworthy and a bit popular security researcher:

• Donate

using

my

permanent

Bitcoin

donation

address

which

is

-

15Zvie1j8CjSR52doVSZSjctCDSx3pDjKZ

• Do it as long as you feel like doing it including as many times and whenever you feel like

doing it as it really help me a lot in terms of paying my bills and assisting my family with

bills and expenses

Dancho Danchev is still missing
Author
Message
...but is alive, apparently.
I feel bad for the dude, sounds like he bit off more than he could chew.
Rumor is that he might be in the crazy house....
FBI?
Dancho missing?
Stuxnet?
thing about it
rumours are that he got paranoid/schizophrenic and is now on a mental hospital
what else could it be when u mix up a light equipment for a bugging device
Krebs next?
What's his nickname by the way?
Powered by Linux - SEO Company
someone should send him emails saying that the fbi is onto him, and will soon catch him. Make his schizophrenia even worst, and hopefully disappear again.
hahahaha.
one less researcher fug we need to worry about
asand he's back:

So, what this means is that any individual's success in the industry comes down to things like reputation, how well you can bullshit, etc. But ultimately we have no way to differentiate, say, Bruce Schneier, who has a long academic- and professional-grade track record and a habit of writing in a highly intellectual fashion on difficult topics, from Dancho Danchev, who is a random Russian dude very few people know anything about, who posts random snippets of facts that pass for "analysis."

abuse.ch guy gets raped

Quote:
After my recent blog post my PayPal account got flooded with fraudulent transactions implying I sell drugs

My recent activity

Date | Type | Name/Email | Payment status | Details | Order status/Actions | Gross

payment for heroin 5 gram dude please give it now!!! cant really wait 3 days before my payment clears!!!

8 hours later:

Quote:
WTF! We are notifying you [...] that you are in violation of PayPal's Acceptable Use Policy regarding your sale of illegal drugs #paypal

i kill'd

haha $100 for 5 grams of H, best deal ever.

looks like site is flooded as well. Owned.

Wonder how long it will take till russian start to hire hitman to eliminate faggots like him.

"[WTB] Hitman for Danchev Danchev, Paying 10k$ in LR"

10minutes later:

"Don't need it anymore, thx"

Taking Cyber Criminals to a whole new level

I really hope it stays like this forever

Danchev posted to his twitter account yesterday, not sure if its really him though

Russian OSINT

Интервью с OSINT специалистом Данчо Данчевым. Не на все вопросы удалось получить развернутые ответы, но в целом посыл понятен. Киберкрайм прогрессирует, ransomware главный тренд 2021 года, а США по-прежнему находится в контрах с Россией. Содержание интервью:

- Кто такой Данчо?
- Чем он знаменит?
- Работа на U.S Law Enforcement и U.S Intelligence Community
- OSINT операция "Uncle George"
- Cybercrime Forum Data Set на 16 Гб
- Ransomware и Darkweb
- Прибыль REvil
- *"Россия остается главным рассадником киберпреступности"*
- Киберпреступность в СНГ

https://telegra.ph/Intervyu-s-hakerom-Dancho-Danchev-04-12

Telegraph

Интервью с болгарским хакером Данчо Данчевым специально для Russian OSINT: Киберкрайм в 2021

Имя: Данчо Данчев / Dancho Danchev Род занятий: ИБ исследователь, OSINT специалист Специализация: Киберкрайм, Darknet && OSINT Страна: Болгария Сайт: ddanchev.blogspot.com Twitter: https://twitter.com/dancho_danchev Russian OSINT: Данчо, расскажи немного...

hu.m.wikipedia.org/wiki/Astala

Astalavista.box.sk	
Page type	search engine
Categories	search page
Available language (s)	English
Establishment	1994
Editor-in-Chief	Dancho Danchev
URL	box.sk

The website operated under a Slovak domain name . The name of the website is based on a movie pun. In the sci-fi action movie Terminator 2 - The Day of Judgment , the protagonist's character had a memorable phrase, "Hasta la vista, baby," a phrase in Spanish that is a commonly used farewell formula. The "astalavista" of this sentence is the merging of the player. It's worth noting that AltaVista , another well-known search engine of the era that sounded similar , was only launched in 1995. [4]

In December 2020, cybercrime researcher and analyst Dancho Danchev, as the operator of the site, announced the relaunch of the website under the domain name box.sk. It is designed to support hackers and cybersecurity experts. [1]

19.3.12 Profiling a New Vendor of ATM Skimming Devices and Stolen Credit Cards

Information On A Major Cybercrime-Friendly Forum Community – Part Two –

An Analysis (2023-03-19 11:05)

[1]

I've recently came across to a currently active underground marketplace forum proposition

that's basically offering and selling ATM skimming devices and stolen credit cards information

where the seller of the devices and the information is basically offering a variety of screenshots

to demonstrate the existence of the service.

Sample screenshots include:

Cloned Cards
(Physical & Shipped)

- Ready to Use Out of the Box
- Easily Cashout at ATM's, In-Stores, & Money Orders
- 3 Distinctive Segments of Cards
- USA Cards, UK Cards, & International Cards Available
- Cards Are Manufactured & Encoded In-House
- USA Cards, UK Cards, & International Cards Available
- Comes Standard with PIN, RFID (Tap to Pay), & Balance

"***Cloned Cards***" are in-house manufactured physical cards based on skimmed data we collect from our network, this data is collected off ATM's, Gas Stations, & POS Machines.

Our network is quite expansive due to our client based network and P2P data affiliate infrastructure (*learn more in our book*). We are then left with tons of data we cannot washout within our native geographic region, so we encode this liquidated data to clients cards that do meet the geographic region capable of cashing out.

We then segment our cards in three categories "***Mid-Balance***", "***High-Balance***", & "***Super-High Balance***". These segments are built upon quantitative variables such as: Balance, ATM Limit, & Bank Variant. We partition each of the categories according to regions in which they are acquired and viable for usage: ***USA Cards, UK Cards***, & ***International Cards***. (*Navigate to "Product Catalog" for Further Insight*).

19.3.13 The OPSEC Infrastructure of the Infamous LATAM Astaroth Banking Trojan -

An OSINT Analysis (2023-03-24 19:51)

[1]

Here’s how to take it offline.

• Grab any public OSINT list and process all the domains in terms of looking for personally

identifiable information

• Figure

out

what’s

the

personally

identifiable

information

which

is

this

case

is

basically

a

Tutanota

(**vicknet@tutanota.com**)

and

a

Protonmail

(**bestchoice-**

firstchoice@protonmail.com) email address account

• A screenshot is worth a thousand words

• Publish and disseminate all the IoCs in a easy to distribute and work on form

• Approach the domain registrant’s hosting provider the let them know the good news

[2]

26770

19.3.14 Upcoming Bulgaria 24 TV Show "Cyber Wars" Participation (2023-03-31 09:52)

[1]

Dear blog readers,

27090

Great news. It appears that I'll be participating in the upcoming TV show "Cyber Wars" on

Bulgaria 24 channel with an interview.

I wanted to say big thanks to the filming crew and the host for the invitation and the questions

and I hope that we'll soon meet again for yet another interview and a conversation.

[2]

19.4.2 Exposing the Fashion Brands of the Conti Ransomware Group (2023-04-06 22:43)

[1]

27094

Dear blog readers,

I've decided to share with everyone a series of photos obtained by data mining the recently

leaked Conti ransomware gang's internal communications with the idea to raise awareness

on some of the fashion brands supposedly managed and operated by members of the

[2]Conti ransomware gang.

Sample personally identifiable information:

19.4.3 Profiling the Internet Connected Infrastructure of the Genesis Market

Cybercrime-Friendly Online Marketplace (2023-04-06 22:43)

[1]

Dear blog readers,

I've decided to take a deeper look inside the Internet connected infrastructure of the recently

seized Genesis Market cybercrime-friendly marketplace with the idea to provide actionable

intelligence and to assist vendors organizations and researchers including U.S Law Enforcement

on its way to properly track down and monitor the cybercriminals behind these campaigns.

Related Genesis Market domains:

hxxp://sync[.]genesis-update[.]net

hxxp://sync[.]genesis-security[.]net

hxxp://g3n3sis[.]pro

19.4.5 Profiling the Internet Connected Infrastructure of the Genesis Market

Cybercrime-Friendly Online Marketplace - Part Two (2023-04-10 11:11)

[1]

Dear blog readers,

I've decided to dig a little bit deeper inside [2]Genesis Market's Internet-connected infrastruc-

ture for the purpose of providing vendors researchers and organizations including U.S Law En-

forcement with additional insights into the Internet-connected

infrastructure of the cybercrime-

friendly forum marketplace.

As I was able to find several other related domains known to have been affiliated in

the campaign both currently and historically I've managed to track down and connect

the dots between the currently active Genesis Market Internet-connected infrastructure

and a well known traffic acquisition hijacking and management for malicious purposes

campaign ([3]aleksei.rqbakov@mail.ru) including a (hxxp://applyinfo[.]org) - [4]DarkHotel

Cyber Espionage related email (hxxp://anteph[.]org) - [5]PushDo malware campaign affili-

ated email (hxxp://darkhero[.]org) - [6]Threat Group 3390 Cyber Espionage related email

(hxxp://googmail[.]org) - [7]Uyghur Targeted Malware campaign related email (hxxp://update-

onlines[.]org) - [8]Threat Group 3390 Cyber Espionage related email.

Here are all of Genesis Market's primary domains:

19.4.6 I’m Back - Part Two (2023-04-13 19:54)

[1]

Jesus. Jesus or Cyber Jessus or it’s just a mentality?

If you can figure out what’s happening here you’ve probably figured out that this is me circa

2010 trying to get "back to basics" online which in the context of meaning really means

hard work a lot of socializing and distributing as much thoughts and random notes including

hard-work driven research as possible to my fellow readers who greatly inspired me to con-

tinue blogging and doing research on my personal blog including the usual volume of traffic

that I get here from friends and colleagues from the industry including the U.S Intelligence

Community and U.S Law Enforcement where it’s my pleasure and an honor to communicate

my findings and research in my area of expertise to my readers and friends on a daily basis.

[2]

If a link is worth a thousand words try the following U.S Secret Server most wanted cybercrimi-

nal which guess what with no laughing here is [3]AbdAllah one of my favorite Russian Business

Network affiliates circa "back in the time".

[4]

27157

Who wants to really help me fund my retirement fund is into collectables and memorabilia

understands my "big picture" including the "big picture" and has BitCoin and wants to give

me a hand here in exchange for something really personal which is my personal 20TB personal

archive files from 2010 when I was on the top of my being popular game up to 2023 present day

where I'm struggling with paying the bills working on part time OSINT projects? Keep reading.

Did you know that if you're a U.S Intelligence Community member doing cyber intelligence

and possible research and stumble upon a "4PXFIL" or "E9BDJ4PXFIL" marking in terms of an

email address account there's a high probability that this is me and several other [5]online

individuals doing "outsourcing SIGINT" also known as "fourth party exfil" for further campaign

attribution and actually bothering to publicly "connect the dots" on major and high profile cyber

attack campaigns where I was proud to participate in a [6]Top Secret GCHQ Program known as

"[7]Lovely Horse" to monitor hackers online and on Twitter for technological know-how possible

labeling them as

[8]

27158

By the way for the record in case you still haven't reached the online dazzlement stage check

out the following screenshot and stay tuned for the actual details. The best is yet to come.

19.4.7 Auctioning Off? Think Twice and Show Your Support! (2023-04-24 17:12)

Surprise, surprise.

Guess who's selling out without being a sellout?

[1]

27160

Although many of you know and remember me from 2010-2013 with my research when I was on

the top of my research and analysis game today's harsh reality is that I think that I'm that very

close to retiring and basically finding another venture to pursue possibly something in the lines

of corporate cyber security investment portfolio and innovation management where I can be of

great help where I'm currently busy paying the bills including a loan including to work on part

time OSINT projects with great success where my primary goal would be to secure a financial

pension and retirement fund in the context of auctioning off my 20TB personal files archive

dating back to 2010 and 2023 for collectibles and memorabilia purposes where among my

primarily long term projects would be to launch a training program in my line of work including

to write a Second Edition of my personal memoir including to write several upcoming books.

Stay tuned!

19.4.8 Who Has Information on the Bad Guys and Wants to Share it with Me?

(2023-04-24 18:23)

[1]

Dear blog readers,

As of today I'm starting to do something that I haven't really done in ages and probably never

really did throughout my entire career which is to do my best to assist friends and colleagues

including the appropriate Law Enforcement parties with research and knowledge on the bad

guys which in this particular case would be to solicit information from my readers on current and

emerging cyber threat actors from my readers using a Dark Web Onion which in this particular

case is:

[2]http://3axk7cmmrvz5ynggt5of2qp5i7ifhfimlnavv23ymm7en7ogjxe57jyd.

Here's what I'm looking for:

• anything related to cyber intelligence in terms of currently active and ongoing campaigns

including all the associated IoCs that you can share and that you think I need to go through

and work on based on your submission such as for instance raw cyber intelligence details

on current and ongoing campaigns domains personally identifiable emails MD5s including

anything that you think and believe might be worth working on in terms of what you're

sharing in terms of "processing" and enriching and working on reaching out to the appro-

priate parties including the proper Law Enforcement parties involved in tracking down and

prosecuting the cyber criminals behind these campaigns

27162

• personally identifiable information on the bad guys which I'll do my best to share with the

appropriate Law Enforcement party including friends and colleagues who can truly make

an impact to track down and prosecute the bad guys based on their campaign activity

Here's what to expect in exchange:

• always make sure to know that I'll go through all the cyber intelligence IoCs personally

identifiable information on the bad guys malware and exploits serving domains and as-

sociated MD5s including anything related to my line of work personally and will work to

enrich and "process" your submission with the utmost professionalism as possible and as

always.

Stay tuned!

19.4.10 Upcoming DVD Training and Educational Research Compilation Release

(2023-04-27 13:49)

[1]

I wanted to let everyone know that I'm going in deep research mode which means approxi-

mately countless days of recording what appears to be my first DVD compilation in the context

of reaching out to my readers and sharing my true story circa the 90's up to present day where

I'll do my best to record my idea as soon as possible and publish it [2]here.

19.4.11 My Memoir - In Bulgarian (2023-04-27 13:49)

[1]

27167

Did you know that I have a [2]memoir [PDF] written in Bulgarian? Did you also known that I

have a two hours long free [3]audio book [MP3] in Bulgarian? Did you also know that you can

also freely download my memoir in Bulgarian in various [4]E-Book

[ePub] format readers for

free?

19.4.12 Who

Needs

or

Wants

OSINT

and

Threat

Intelligence

Training?

(2023-04-27 13:50)

[1]

If anyone's interested in advanced online OSINT and advanced online cyber threat actor profil-

ing and threat intelligence training both individually or in group feel free to drop me a line at

dancho.danchev@hush.com to discuss.

This is the primary Table of Contents for the advanced OSINT training which I can offer:

• Introduction

• Who is Dancho Danchev?

• What are some of my current and future projects?

• Basics of OSINT

• Current State of the Cybercrime Ecosystem

• Novice OSINT Tactics

• Advanced OSINT Tactics

• Fighting Cybercrime in the Context of Using OSINT

• Threat Intelligence Gathering in the Context of Using OSINT

• Technical Collection in the Context of Using OSINT

• Cyber Attack Attribution in the Context of Using OSINT

• Threat Intelligence Enrichment in the Context of Using OSINT

• Cybercrime Research and Enrichment in the Context of Using OSINT

• Practical OSINT Advices

• Case Study on Fighting Cybercrime Using OSINT

• Case Study

• First Case Study

• Second Case Study

• Third Case Study

• Fourth Case Study

• Fifth Case Study

• Conclusion

27169

This is the primary Table of Contents for the advanced threat intelligence training:

• Introduction

• Overview

• Threat Intelligence Methodologies

• Proactive Threat Intelligence Methodologies

• The Future of Threat Intelligence

• Basics of Threat Intelligence

• Current State of the Threat Intelligence Marketplace

• Current State of the Threat Intelligence Ecosystem

• Novice Threat Intelligence Concepts

• Advanced Threat Intelligence Concepts

• Fighting Cybercrime in the Context of Using Threat Intelligence

• Using OSINT in the Context of Threat Intelligence Gathering

• Threat Intelligence in the Context of Using Technical Collection for Cyber Threat Actor

Attribution Attacks

• Threat Intelligence in the Context of Cyber Attack. Attribution

• Threat Intelligence Enrichment in the Context of Using OSINT

• Cybercrime Research and Threat Intelligence IoC (Indicator of Compromise) Enrichment

in the Context of Using OSINT

• Practical Threat Intelligence Advices

• Case Study on Fighting Cybercrime Using Threat Intelligence

• Case Study

• First Case Study - The Basics of Starting Into Threat Intelligence for Beginners - A Practical

Case Study

• Second Case Study - Advanced Threat Intelligence Practices Concepts and Methodologies

- A Practical Case Study

• Third Case Study - Does the "Aggregate and Forget" Methodology Really Work in the Field

of Threat Intelligence? - A Practical Case Study

• Fourth Case Study - The Basics of Launching and Maintaining and Operating a Company

Wide Threat Intelligence Program for Beginners - A Practical Case Study

• Fifth Case Study - Advanced Operation and Maintaining of a Company Wide Threat Intelli-

gence Program for Advanced Users - A Practical Case Study

27170

• Sixth Case Study - How to Train Your Threat Intelligence Analysts to be Security Industry’s

and Analytical and Technical Rock Stars? - A Practical Case Study

• Seventh Case Study - How to Convert Your Company Employee

Endpoints Into a Dis-

tributed Threat Intelligence Passive and Active Threat Intelligence Gathering Sensor? -

A Practical Case Study

• Eight Case Study - How To Convert Your Clients Into a Passive and Active Distributed Threat

Intelligence Gathering Sensors? - A Practical Case Study

• Ninth Case Study - How to Utilize Public and Proprietary Threat Intelligence Databases for

Cyber Threat Actor Attribution Campaigns Including Cross Reference and Cross Checking

of

• Tenth Case Study - How to Enrich Your Company Wide IoCs (Indicators of Compromise)

Using Public and Proprietary Sources and Connect the Dots on a Major Cyber Attack and

Cyber Threat Actor Campaign

• Conclusion

And here's a sample introduction for the OSINT training which I can offer with the idea to get

you to know the actual style of the training:

Basics of OSINT in the Context of Fighting Cybercrime - The Definite Beginner's Guide

"*What use are they? They've got over 40,000 people over there reading newspapers.* " - Presi-

dent Nixon

This introductory guide into the world of OSINT is part of an upcoming series of articles aiming to

assist both novice and experienced security practitioners including

analysts for the purpose of

entering the world of OSINT for cybercrime research and aims to offer a high-profile and never-

published before practical and relevant in today's nation-state and rogue cyber adversaries

Internet and cybercrime ecosystem whose purpose general overview and introductory material

and training course material for novice beginners including advanced Internet users hackers

security consultants analysts including researchers who are interested in exploring the world

of OSINT (Open Source Intelligence) for the purpose of making a difference doing their work in

a better and more efficient way including to actually be fully capable and equipped to catch

the bad guys online including to monitor and track them down to the point of building the big

picture of their fraudulent and rogue online activities. The course including the actual learning

and training material is courtesy of Dancho Danchev who is considered one of the most popular

security bloggers threat intelligence analysts and cybercrime researchers internationally and

within the security industry.

The primary purpose behind this guide is to summarize Dancho Danchev's over a decade of

active passive and active including actionable threat intelligence and OSINT research type of

experience including cybercrime research type of experience where the ultimate goal would

be to empower the student or the organization taking this course into

better doing their online

research work including to be fully capable of tracking down and monitoring the rogue and

malicious online activities of the bad guys online where the ultimate goal would be to better

position and enhance your cyber attack or malicious threat actor cyber campaign attribution

skills ultimately improving your work activities and actually empowering you to learn how to

do OSINT for good and most importantly to track down and monitor the bad guys.

Introduction

27171

In a world dominated by sophisticated cybercrime gangs and nation-state sponsored and toler-

ated rogue cyber actors the use of OSINT (Open Source Intelligence) is crucial for building the

big picture in the context of fighting cybercrime internationally including to actually "connect

the dots" in the context of providing personally identifiable information to a closed-group and

invite-only LE community including international Intelligence Agencies on their way to track

down and prosecute the cybercriminals behind these campaigns.

In this training and learning material Dancho Danchev one of the security industry’s most

popular and high-value security blogger and cybercrime researcher will offer an in-depth peek

inside the world of OSINT in the context of fighting cybercrime and will provide practical advice

examples and case in particular on how he tracked down and shut down the infamous Koobface

botnet and continued to supply never-published and released before potentially sensitive and

classified information on new cyber threat actors which he continued to publish at his Dancho

Danchev's blog.

Basics of OSINT

OSINT in the context of fighting cybercrime can be best described as the systematic and persis-

tent use of public information for the purpose of building a cyber threat intelligence enriched

data sets and intelligence databases both for real-time situational awareness and historical

OSINT preservation purposes which also include to actually "connect the dots" in cybercrime

gang and rogue cyber actor campaigns and cyber attack type of campaigns. A general ex-

ample would consist of obtaining a single malicious software sample and using it on a public

sandbox to further map the infrastructure of the cybercriminal behind it potentially exposing

the big picture behind the campaign and connecting the dots behind their infrastructure which

would lead to a multi-tude and variety of personally identifiable information getting exposed

which could help build a proprietary cybercrime gang activity database and actually assist LE

in tracking down the prosecuting the cybercriminals behind these campaigns.

"There's no such thing as new cyber threat actors. It's just new players

adopting economic

and marketing concepts to steal money and cause havoc online."

The primary idea here is to locate free and public online repositories of malicious software and

to actually obtain a sample which will be later on used in a public sandbox for the purpose of

mapping the Internet-connected infrastructure of the cybercrime gang in question including to

actually elabore more on the ways they attempt to monetize the access to the compromised

host including possibly ways in which they make money including to actually find out what

exactly are they trying to compromise. Possible examples here include VirusTotal or actually

running a malware interception honeypot such as for instance a spam trap which would allow

you to intercept currently circulating in the wild malare campaigns that propagate using email

and actually analyze them in terms of connecting the dots exposing their Internet-connected in-

frastructure and establishing the foundations for a successful career into the world of malicious

software analysis and cybercrime research.

"Everything that can be seen is already there".

The next logical step would be to properly assess and analyze the recently obtained sample and

to properly establish the foundation of a "connect the dots" culture within your organization

where the primary goal would be to have researchers and analysts look for clues on their way

to track down and monitor a specific campaign potentially coming up with new and novel cyber

attack attribution research. Visualization is often the key to everything in terms of visualizing

threats and looking for additional clues and possible cyber attack attribution clues where a

popular visualization and threat analysis tool known as Maltego should come into play which

basically offers an advanced and sophisticated way to process OSINT and cybercrime research

27172

and threat intelligence type of information and actually enrich it using public and proprietary

sources of information for the purpose of establishing the big picture and actually connecting

the dots for a specific cyber attack campaign.

Among the first things that you should consider before beginning your career in the World

of OSINT is that everything that you need to know about a specific online event a specific

online campaign that also includes the activities of the bad guys online is already out there

in the form of publicly accessible information which should be only processed and enriched

to the point where the big picture for a specific event or a malicious online campaign should

be established using both qualitative and quantitative methodologies that also includes the

process of obtaining access to the actual technical details and information behind a specific

online event or an actual malicious and rogue online campaign.

Among the few key things to keep in mind when doing OSINT including actual OSINT for cyber

attack and cyber campaign attack attribution is the fact that in 99 % of the cases all the col-

lection information that you need in terms of a specific case is already publicly known and is

publicly accessible instead of having to obtain access to a private or a proprietary source of

information and the only thing that you would have to do to obtain access to it is to use the

World's most popular search engine in terms of collection processing and enrichment.

The second most popular thing to keep in mind when doing OSINT is that you don't need to

obtain access to proprietary even public OSINT tools.

Current State of the Cybercrime Ecosystem

In 2021 a huge number of the threats facing the security industry including vendors and orga-

nizations online include RATs (Remote Access Tools) malicious software part of a larger bother

malicious and fraudulent spam and phishing emails including client-side exploits and vulner-

abilities which have the potential to exploit an organization or a vendor's end points for the

purpose of dropping malware on the affected host including the rise of the ransomware threat

which is basically an old fashioned academic concept known as cryptoviral extortion.

With more novice cybercriminals joining the underground ecosystem market segment largely

driven by a set of newly emerged affiliate based revenue sharing

fraudulent and malicious

networks offering financial incentive for participation in a fraudulent scheme it shouldn't be

surprising that more people are actually joining the cybercrime ecosystem potentially causing

widespread damage and havoc online.

With cybercrime friendly forums continuing to proliferate it should be clearly evident that more

people will eventually join these marketplaces potentially looking for new market segment

propositions to take advantage of for the purpose of joining the cybercrime ecosystem and that

more vendors will eventually continue to occupy and launch new underground forum market

propositions for the purpose of promoting and looking for new clients for the services.

In a World dominated by a geopolitically relevant Internet cybercrime ecosystem it shouldn't

be surprising that more international cybercrime gangs will eventually continue to launch new

fraudulent and malicious spam and phishing campaigns that also includes malicious software

campaigns for the purpose of earning fraudulent revenue.

With more affiliate based underground market segment based networks aiming to attract new

uses where they would forward the risk for the actual infection process and fraudulent transac-

tion to the actual user in exchange for offering access to sophisticated bulletproof infrastructure

including advanced and sophisticated malware and ransomware releases it shouldn't be sur-

prising that more people are actually joining these affiliate networks for the purpose of earning

fraudulent revenue in the process of causing havoc and widespread disruption online.

27173

In this brief Basics of OSINT in the context of fighting cybercrime article we provided a general

overview of the process of using OSINT for cybercrime fighting purposes and we hope that you

enjoyed the article and will be eager to go through the second part of the article series which

will be published at our Web site in the coming weeks.

19.4.13 Today's Compilation of Botnet's C&C Panels (2023-04-28 13:31)

[1]

I decided to share with everyone a currently active set of botnet C &C panels which I

obtained using OSINT and public sources which are currently active in the time of posting

this with the idea to raise more awareness on their existence and potentially prompt you to

go deeper in terms of research and tracking down the cybercriminals behind these campaigns.

Known responding IPs:

190[.]123[.]44[.]145

19.4.15 How I Got Busted for Loving the U.S in Cyberspace? (2023-04-28 13:32)

[1]

Guess who's been busy setting them straight in cyberspace? Well that would be unfortunately

throughout 2008–2013 when I was most active online making the headlines at unknown places

online making my day and inspiring me to track down the Koobface botnet on a daily basis.

[2]

It used to be quite a privilege when I originally attempted to publish an article which I

proposed to one of my homeland's primary technology magazine HiComm and when I got

actually invited to publish a series of articles on a monthly basis. Among the first things

which I did back then was to translate my extremely popular document "The Complete

Windows Trojans Paper" to Bulgarian which was quite a success and the article got published

and accepted which was originally published in the Christmas edition of the magazine. The

original story behind my infamous "The Complete Windows Trojans Paper" was a major shift

between my understanding and experience within the hacking Scene and the modern

security industry where I really wanted and did my best to have a career which leads me to

today's leading expert in the field of cybercrime research and threat intelligence including

security blogging and OSINT research and analysis on the bad guys including various

international and well known cyber threat actors.

I originally wrote and released my “The Complete Windows Trojans Paper” on my own as part

of a major marketing effort to promote my knowledge and expertise in the scene where the

ultimate goal was to produce a high-quality and never released publication on the topic and

basically make it easier for everyone to understand the ongoing trend that have to do with

trojan horses back then where I later on originally published my publication on what used to

be among my first independent contractor position at my first employer at the time which

was Netherlands-based Frame4 Security Systems where I also did a marketing editorial on

27195

the company’s web site and has been supporting and working with the company ever since.

The interesting part back then was that I also got a personal recommendation from the

company owner for my university application which at the time was a Netherlands-based

university where I had the ambition to relocate with my girlfriend and partner in life at the

time which we eventually did with the idea to visit and actually go to study in that country.

While I was in Bulgaria during my teenage hacker years I was busy freelancing as an

information security consultant while working with international security portals where I was

busy offering advice and practical information security advice and practical solution

recommendations including my work with CIO.bg where I once contributed with an article on

Cyberterrorism and Cyber Jihad including a series of publications for HiComm.bg where I was

running a popular information security rubric and participated with several articles in several

of the magazine's issues.

At a later stage I somehow decided to go corporate an in a way find a way to enter the

commercial information security industry with my knowledge potentially beginning to

contribute with knowledge and information using my personal contacts at various information

security portals on my way to land a possible job preferably as a writer security blogger or a

journalist which I apparently succeeded in doing as I've been actively contributing with my

own research and knowledge on a variety of h/c/p/a (Hacking/Cracking/Phreaking/Anarchy)

portals at the time. At some point in time Dancho decide to approach the primary operator of

one of his favorite security Web sites at the time — https://net-security.org for the purpose of

contributing with an article for their newly launched forbidden.net-security.org project.

My idea was to contribute with a security article for their recently launched Newsletter and

the article in question was a good old-fashioned "How to use trojan horses" manual. The

article eventually got accepted and Dancho felt proud of himself for making a contribution to

the project and having his article published so that eventually more people will read it and

send him an email with questions about trojan horses and the actual article. The primary

Webmaster of net-security.org at the time was Berislav Kucan and the project still remains

one of my favorite and most popular visited security Web site on a daily basis. At a later

stage I decided to establish a working relationship with Frame4 Security Systems which is a

Dutch-based company for the purpose of writing an improved version of the original “How to

use trojan horses” paper which later on became the “The Complete Windows Trojans Paper”

which quickly became one of the Scene’s most popular and highly read paper on modern

trojan horses and how to use them and how to protect against them.

With the summer coming to an end I got an offer to begin to work at the local office of his ISP

(Internet Service Provider) which at the time was Digital Systems for the position of office

assistant where he was responsible for introducing new clients to the ISP’s service offering

and for processing invoices. Among the key benefits for working at the local ISP office was

the actual bandwidth that he got access to allowing him to access the Internet without any

sort of limitations which he used to visit some of his favorite Top50 and Top100 security and

hacking Web sites where he eventually downloaded some of the most recently released

hacking and security tools including trojan horses which he copied on a floppy disk and

27196

eventually brought back home during the lunch break for the purpose of exchanging the

information with his second employer at the time which was an anti-trojans vendor using a

publicly accessible FTP server for the purpose of helping his employer improve the detection

rate for these type of programs and trojan horses. I would then receive a payment for having

collected and actually shared these programs and trojan horses which he would use to pay

the bills at the time and actually pay for using his ISP's service.

At some point in time he eventually got approached by a guy known as HeLLfiReZ who was

interested in working with him and actually sharing his collection of trojan horses which he

would then also share with his employer which at the time was LockDownCorp and earn

revenue in the process. It would later come to his attention that the guy that approached him

was actually one of the key members of the infamous Sub7 trojan horse group which at a

particual point in time was responsible for launching a DDoS (Distributed Denial of Service)

attack against the researcher Steve Gibson who extensively profiled the campaign and

actually had a conversation with HeLLfiReZ and his team members for the purpose of finding

out how launched the attack and how it took place. He would

eventually run a personal

hacking and security Web site archive using hosting courtesy of his employer LockDownCorp

and run a popular Hacking and Security Web site which he would then feature on

Progenic.com's Top100 Hacking and Security Web sites including to actually offer paid

security consultations in terms of finding out ways to help people protect their home PCs from

trojan horses and teaching them how to use a firewall and how they can secure their home

PCs.

At a later stage in his early Information Security career he would visit and join

https://itsecurity.com's Security Clinic where I would have his personal biography featured

and actually respond to common security questions which users of the Web site will submit

and have his response featured on the front page potentially driving traffic to his employer at

the time which was Frame4 Security Systems and actually improving his knowledge and

understanding of Information Security in general. Dancho was also known for having

participated in the Blackcode Ravers hacking group which was running the popular

https://blackcode.com Web site at the time and actually participated with two issues of a

popular Security Newsletter at the time which were featured on the home page of the portal.

During the glorious years of IRC (Internet Relay Chat) where Dancho

was busy hanging on

several IRC networks including DALNet and his local country's IRC network he managed to

obtain the /etc/shadow password file for his entire ISP (Internet Service Provider) which at the

time was Digital Systems and shared a copy of it with his best friend at the time George

Kadiyski for the purpose of using several popular and high-profile Wordlists including John the

Ripper password cracker potentially obtaining access and brute-forcing the entire password

list for hundreds of active dial-up Internet based accounts at the time.

Over a period of several days the results at the time were outstanding in the context of

actually succeeding in the brute-forcing process potentially allowing Dancho and his friend to

easily access free Internet based dial-up accounts which at the time cost money allowing

them to use the Internet for free. At a later stage Dancho also managed to obtain access to

his local town's competing ISP (Internet Service Provider) which was known as BIANet

/etc/shadow which was send to him by a friend and he also once again shared it with his

27197

friend who would once again begin brute-forcing the password file using a variety of

Worldlists and the infamous John the Ripper passwor cracking tool at the time potentially

allowing Dancho and his friend easy access to unlimited Internet based dial-up connectivity.

It would be fairly easy to assume how things got complicated with Dancho quickly obtaining

access to Internet Relay Chat's primary mIRC application including a variety of IRC-based

"War Scripts" including a dozen of mail-bombers and various other ICQ-based type of Nukers

and Flooders on his way to demonstrate a proper technical know-how to his friends and peers

in the shady world of hacking. Among the first channels he tried to access were #hacker

#hackers #hacking and the infamous #hackphreak on EFNet including to actually open

several personal channels on the local IRC networks including #drugs #KGB and

#linuxsecurity. At a later stage he actually managed to ask a friend for a possible operator

status on the local town's IRC channel where he was basically running a 24/7 online

protection bot known as xploit including the active use of a Socks5 server which at the time

was offered by his employer LockDownCorp where he was busy acting as Technical Collector

of trojan horses/worms/viruses and VBS scripts for the purpose of improving the anti-trojan

software's signatures-based detection rates.

Among the first thing that Dancho decided to do in his spare time is to actively research the

local Webmaster of his hometown's official Web site for the purpose of attempting to launch a

social engineering attack against his local town's official Web site which basically succeed

and resulted in a “greeting” message being posted on the official Web site with no actual

data destruction and data removal taking place in what would appear to be a professional

approach when compromising a legitimate Web site for the purpose of greeting his personal

friends and spread a message on behalf of “Trojan Hacking Group” which at the time basically

consisted of one of his closest friends and another fellow hacker enthusiast. Among his

responsibilities the time included the active collection of trojan horses/worms/viruses and

VBS Scripts with the idea to share them with his employer which at the time was

LockDownCorp one of the world’s leading anti-trojan vendors for the purpose of improving

the detection rate for these publicly accessible trojan horses in what would later on mature

into a successful Technical Collection operation which basically paid his bills and actually

offered him a decent financial incentive to continue getting involved in security as a hacker

enthusiast and actually improved his employer’s overall detection rate for some of the most

prolific trojan horses at the time.

The actual contractual agreement had to do with Dancho using a private FTP server where he

would spend hours uploading collected trojan horses using his home-based dial-up connection

and eventually earning a revenue in the process using Western Union where he was happy to

have established direct working relationship with one of the world's leading anti-trojans

vendors which at the time was located at — http://proxy2.stealthedip.com/maniac/incoming/

Whenever Dancho would attempt to reach out to his friends he would attempt to find out

whether they are online using a popular trojan horse including to actually check his email

account for their recently changed passwords and other related information including their

current IP so that he can properly connect to their home PC for educational purposes.

27198

[3]

While Dancho was busy studying in the Netherlands he was busy persistently checking one

of the World's most popular and high-trafficked Web sites for hackers and security experts -

Astalavista.com - and sticking to the common wisdom circa the 90's where everyone was busy

making contributions and launching new groups - he decided to approach the company behind

the portal with a possible business proposal that basically consisted of having him monitor and

actually maintain the portal in terms of content including the actual production of a high-profile

Security Newsletter where we would produce security and hacking articles including a featured

Security Interview with key members from the Scene and the Security Industry.

What used to be a daily routine to work for ZDNet's Zero Day blog for four productive years

on a daily basis as a security blogger in between publishing personal

research on my blog and

later on receiving a direct offer to work with Webroot for the position of a security blogger

was a dream come true where on both places I had the privilege to work and contribute with

knowledge and research with some extremely knowledgeable and popular folks including my

corporate citizenship passport which at the time was the crown jewel of my experience which

was to visit InfoSec Europe 2012 in Earls Court in London with my company Webroot where

knowing everyone and working with everyone from day one was quite a success and I'm ex-

tremely grateful for contributing to the growth of the company with my own knowledge and

expertise and for basically that I have up to present day which was the highlight of my research

at the time namely to join the company and enter the corporate world of information security

and security blogging which I know so well up to present day and highly miss the productive

days back then.

Started by a hacker/enthusiast in 1997, Astalavista has grown into an amazing melting pot of black hats, white hats, and everything in between. Whether you're learning how to be digitally naughty or you want to know how to avoid becoming a victim, it's hard to find a better mixture of battlefront news, tips, cracks, and hacks.

Prior to getting a confirmation from a Team Member of the actual owner of the portal at the

time Dancho quickly began entering into negotiations about a possibly paid including a free

venture at the time where he could earn a small commission for producing a high-quality

security newsletter and actually be responsible for all the security and hacking content at

Astalavista.com on a monthly and daily basis. As he began working on the monthly

newsletter the first issue including the remaining twenty six issues which he produced over a

period of three years were quite a success including the actual Geeky Photos section where

portal users could send in photos of their desktop computers for the purpose of featuring

them at the Web site potentially promoting their desktop setups to our audience at the time

eventually leading him and the portal to win a PCMagaine Top 100 Security Sites Award back

in 2005. Among Dancho's main responsibilities at the time where the daily updating of the

portal with high quality security documents tools and presentations including actual hacking

and security links and overall responsibility for all the content at the Web site including the

production of a highly popular security newsletter at the time including to actually answer and

work on possible partnership and advertising inquiries at the time which led to a successful

repositioning of the portal as one of the primary information security portal services online.

27201

Jessus. Who would have thought? At a specific point in my time and my career as a

cybercrime fighter and cybercrime researcher including OSINT analyst and threat intelligence

analyst at some point in time after approximately a decade in fighting bad guys and actually

tracking them down and exposing their infrastructure I finally got a

very interesting email

which was basically a screenshot courtesy of a Russian Business Network franchise member

that was basically showcasing ownership over their primary domain which was nearly

impossible to receive and in specific the fact that the original and primary Russian Business

Network franchise domain name doesn't really exist in the context of having virtual no clues

of its online existence which was quite a remarkable success in the context that it would have

motivated many to pursue a pension in the field which basically included the actual message

saying "hi" and greeting me which was quite a success at the time in the context of receiving

a personal message from the Russian Business Network franchise proving ownership of their

primary domain name. How did I originally stumbled upon the Russian Business Network? It

was by going through other people's research on the topic and basically by doing my job at

Dancho, HBGary is interested in talking w/ you about Threat Intelligence

---

From:greg@hbgary.com

To: dancho.danchev@gmail.com

Date: 2009-04-15 13:02

Subject: Dancho, HBGary is interested in talking w/ you about Threat Intelligence

---

Dancho,

My company, HBGary, is developing a new business unit which we call "Global Services". A keystone of the offering is tracking human and organizational factors behind malware threats. Your work, and some of the work of your peers, seems to be very good analysis in this area. Since the space is new to us, I want to tap the best minds in the industry to help us develop an offering. Would you be interesting in spending some time with our team to discuss your work and methodology? On the market side I am also trying to pin down what customers will actually pay for, and perhaps you have some insight here as well. I am willing to hire you as a consultant, and/or pay for your time and travel in any way that works for you. I will be at RSA next week, and our company has an event for customers in San Jose in the first or second week of May. I also travel to Washington DC quite alot.

the time which was quite a success in terms of daily monitoring for malicious and fraudulent

online activity which led me to stumble upon their malicious infrastructure on numerous

occasions in specific to find out more about their rogue and malicious bulletproof hosting

infrastructure which used to dominate the threat landscape at the time in terms of popularity

and the primary bulletproof hosting provider for a variety of cybercriminals internationally. I

was also originally inspired by the usual source of inspiration for me which was basically

iDefense actual threat research reports at the time that were basically going a step beyond

the typical threat intelligence reports and were basically including all

the necessary and

in-depth details on various cyber threat actors at the time including primary sources of

cybercrime activity internationally.

[7]

Among the first things that I did prior to trying to pop up online back in full speed and fashion

was to quickly built a set of projects including to launch several popular and interesting

initiatives such as for instance Law Enforcement and OSINT operation called “Uncle George”

where the ultimate goal was to collect as much publicly accessible information on the bad

27203

guys then data mine and present my findings to the wider security industry and community

including to look for and present tons of actionable intelligence on the bad guys which could

have been useful in the context of having vendors and organizations attempt to launch cyber

attack and cyber campaign attribution efforts against these individuals.

At some specific point in time I came across the local for Bulgaria Cyber Security Talks event

where I applied to make a presentation which got accepted which led me to eventually pop

up at the event in front of eighty people and make a high-quality personal presentation on

cybercrime research OSINT and threat intelligence including my general experience in the field

as an expert in the field of cybercrime research OSINT and threat intelligence gathering where

I'm an independent contractor since practically December, 2005.

It used to be a moment when I originally started getting involved in OSINT (Open Source Intelli-

gence) as an independent contractor when I originally came across to the following document

which greatly inspired me to join this space - "Reexamining the Distinction Between Open Infor-

mation and Secrets" while browsing through Globalsecurity.org Fas.org Cryptome.org at that

time. The primary reason why OSINT inspired me to become an independent contractor in this

space in specific information security is the fact that a lot of the documents that I had to go

through to learn what OSINT is and how to do it were either classified or publicly accessible

however coming from important sources of information such as for instance the CIA.gov includ-

ing various other U.S Government and U.S Intelligence Community sources of information. It

is my opinion that the power of OSINT primary relies on the actual collection and working with

the actual decision-making information using public sources which also includes actual enrich-

ment and colleration between multiple sources of publicly accessible classified and declassified

information which makes this area quite interesting to join from an independent contractor per-

spective in the information security field.

> Данчо Данчев е на 26 години, международно признат експерт по киберсигурност. Той пише за специализирания блог Zero Day, част от новинарската мрежа zdnet.com. През септември 2010 г. Данчо Данчев изчезва и оттогава не отговаря на своите координати. Последната му активност в Twitter е от октомври. От вътрешното министерство коментират, че Данчо Данчев досега не е бил обявяван за изчезнал от своите близки.

At a specific point in time I must have gathered a proper momentum among my readers which

I never really knew anything about including the bad guys in the context of intercepting a

chatter mentioning me in a pretty bad context despite the fact that this is untrue as most of

my research and the research that I did was in a passive mode namely I never really engaged

anyone in specific friends and colleagues from the industry including the bad guys as I'm a

firm believer that you can collect all the information that you need on them without bothering

to interact or approach them. Among the few key comments that I've ever came across to

referencing me in my entire career on a major cybercrime-friendly forum community was a

Darkode discussion including a hitman request for me which apparently managed to find me

one way or another including a second discussion which basically referenced my name and

insisted that the same thing that took place with me back in 2011 will happen again. What

really took place back in 2011 in my apartment in Sofia where I relocated on my own and where

I insisted to live on my own and do my research using my ZDNet salary as a primary means to

pay for my rent and living expenses is.

[9]

The primary reason behind this post is to tell my story with all the juicy details up to present

day and actually offer an in-depth and never discussed before perspective on my research in-

cluding to present and communicate the crown jewels of my research to a vast and growing

network of readers internationally where the ultimate goal would be to properly present the

true story behind my professional career including to offer an in-depth peek inside my teenage

hacker years experiences while properly present my story up to present day where I'm an inter-

nationally recognized cybercrime researcher security blogger and threat intelligence analyst.

Dancho Danchev Presenting at CyberCamp 2016 in Spain How did I

attempt to take down the

Koobface botnet? Who's Hilary Kneber? What was the primary idea behind "Keeping Money

Mule Recruits on a Short Leash" blog post series? How did I prevented and actually detected a

possible kidnapping attempt? How did I made it to the GCHQ with the Honeynet Project? Is is

true that I've received an invitation to present at Canadian Intelligence Services? What's my

professional experience with my current employer WhoisXML API?

[10]

27205

I never really bothered to stop publishing content on my personal blog

which I felt is an obliga-

tion to the society and my readers who I really know nothing about in the context of presenting

my knowledge and they will come and in the context of never really bothering to set up my

Google Analytics property properly where I was sticking to basically monitoring my RSS Feed-

burner subscriber account which at the time peaked at 7,000 RSS readers on average on a

daily basis which is quite a success for one man operation that never really bothered to know

anyone from the industry in the context of basically presenting my findings and knowledge and

later on getting surprised in the context of having folks and people from the industry approach

me to say hi invite me to attend a conference share information or ask for information where

I'm always there to appreciate their research and knowledge and continue to contribute with

research and knowledge on my personal blog.

How did I attempt to take down the Koobface botnet? Who's Hilary Kneber? What was the

primary idea behind "Keeping Money Mule Recruits on a Short Leash" blog post series? How

did I prevented and actually detected a possible kidnapping attempt? How did I made it to

the GCHQ with the Honeynet Project? Is is true that I've received an invitation to present at

Canadian Intelligence Services? What's my professional experience with my current employer

WhoisXML API?

What does rocking the boat really means? If it's going to be massive it better be good. At some

particular point in time when I was busy working on my personal blog I remember a moment

when every day's story used to dominate my life being in particular the fact that I've managed

to tell a story for the purpose of sharing it and reaching out to my readership which at the time

I was hoping that it was growing with several high prole daily users that I was busy tracking on

a daily basis.

The juicy details? At some point in time when I was originally secretly monitoring who was

visiting my blog using Statcounter.com where I was hoping to see someone famous I've noticed

that I got a regular visitor from The Pentagon who was basically visiting the blog on a daily basis

during not necessarily a specific time but in general which was great news and this greatly

motivated me to continue posting high-quality research and news and commentary articles on

various events that took place in the security industry including across the globe.

I also got several visitors from the CIA, the NSA including the FBI the NYTimes and BBC which

was an outstanding audience at the time which was quite interesting to monitor and interact

with at that time through my daily blog posts on a variety of interesting and high-quality topics.

Up to present day I'm a 38 years old security blogger OSINT analyst and threat intelligence an-

alyst from Bulgaria. I'm currently running one of the security industry's most popular security

publications which is my personal blog - Dancho Danchev's Blog - Mind Streams of Information

Security Knowlwedge. I've been running my publication since December, 2005 and throughout

the years I had an overage of 7,000 RSS feed subscribers including 5.6M page views throughout

27208

the years making my blog an extremely important switchboard to the world of security blog-

ging OSINT research and analysis threat intelligence analysis and most importantly cybercrime

fighting research and analysis.

I’m also acting as a DNS Threat Reseaarcher at WhoisXML API.

Among my key accomplishments include my "lawful surveillance" and "lawful interception" ex-

perience as teenage hacker the production of the popular Astalavista Security Newsletter circa

2003–2006 including the "take-down" of the Koobface botnet [MP3] including a participation in

Top Secret GCHQ program called "Lovely Horse" including regular appearance in major news

publications for interview and expert opinion including Techmeme, ZDNet, CNN, PCWorld, SC-

Magazine, TheRegister, NYTimes, CNET, ComputerWorld, H
+Magazine and regular security and

research presentation appearance at major security events at GCHQ, Interpol, InfoSec Europe,

RSA Europe and CyberCamp.

I’m an internationally recognized expert in the field of cybercrime fighting and threat intelli-

gence gathering having actively pioneered my own methodlogy for processing threat intelli-

gence which leads me to a successful set of hundreas of high-quality anaysis and research

articles published at the industry’s leading threat intelligence blog - ZDNet’s Zero Day, Dan-

cho Danchev's Mind Streams of Information Security Knowledge and Webroot's Threat Blog

with his research featured in Techmeme, ZDNet, CNN, PCWorld, SCMagazine, TheRegister, NY-

Times, CNET, ComputerWorld, H+Magazine currently producing threat intelligence at the indus-

try's leading threat intelligence blog-Dancho Danchev's-Mind Streams of Information Security

Knowledge.

With my research featured at RSA Europe, CyberCamp, InfoSec, GCHQ and Interpol I con-

tinue to actively produce threat intelligence at the industry's leading threat intelligence blog-

Dancho Danchev's-Mind Streams of Information Security Knowledge publishing a diverse set

of hundreds of high-quality research analysis detailing the malicious and fraudulent activities

at nation-state and malicious actors across the globe.

Key achievements include:

- Presented at the GCHQ with the Honeynet Project

- SCMagazine Who to Follow on Twitter for 2011

- Participated in a Top Secret GCHQ Program called "Lovely Horse"

- Identified a major victim of the SolarWinds Attack-PaloAltoNetworks

- Found malware on the Web Site of Flashpoint

- Tracked monitored and profiled the Koobface Botnet and exposed one botnet operator

- Made it to Slashdot two times

- My Personal Blog got 5.6M Page Views Since December, 2005

- My old Twitter Account got 11,000 followers

- I had an average of 7,000 RSS readers on my blog

- I have my own vinyl "Blue Sabbath Black Cheer / Griefer - We Hate You / Dancho Danchev Suck

My Dick" madeby a Canadian artist

- Currently running Astalavista.box.sk

- I gave an interview to DW on the Koobface Botnet

- I gave an interview to NYTimes on the Koobface botnet

27209

- I gave an interview to Russian OSINT

- Listed as a major competitor by Jeffrey Carr's Taia Global

- Presented at the GCHQ

- Presented at Interpol

- Presented at InfoSec

- Presented at CyberCamp

- Presented at RSA Europe

In this video I'll discuss in-depth a variety of personal projects and current and ongoing both

real-time current and historical research and analysis activities in the following categories such

as for instance:

- My Dark Web Onion

-My Uncle George Law Enforcement and OSINT Enrichment Operation

-My Cybercrime Forum Data Set

-My Unit-123.org E-Shop for Intelligence Deliverables Project

-My Offensive Warfare 2.0 Threat Intelligence Clearing House Project

-My Disruptive Individual's Threat Intelligence Feed

-My Current work as a DNS Threat Researcher with WhoisXML API

-How I ended up in Snowden's Archive?a

-How I ended up on Wikileaks?

-How I made it into several comparative academic studies on the quality of sharing threat

intelligence and cybercrime research information?

-How come I'm the only one listed as a competitor in Jeffrey Carr's Taia Global Competitors

Slide?

-What's it's like to run the infamous Astalavista.com portal back in 2003–2006 where I was

acting as a Managing Director?

-What it's like to get the privilege to work as a security blogger at ZDNet's Zero Day blog for

four years?

-What's it's like to work as a security blogger with Webroot for two years?

27211

-How I ended up and spend the last couple of years doing OSINT on the bad guys?

-How I ended up having a project on the infamous Astalavista.box.sk?

-A brief introduction into some of the latest developments and research that I posted on my

personal blog-Dancho Danchev's Blog-Mind Streams of Information Security Knowledge

-How I ended up having a mobile application?

-How I ended up having a personal memoir?

-How I got busted?

-What it's like to visit the GCHQ?

-What it's like to meet the security industry?

-What it's like to visit RSA Europe 2012?

-What it's like to visit InfoSec 2012?

-What it's like to visit CyberCamp 2016?

-What it's like to get an invitation to visit Canada's Security Service?

-My DIA Needpedia Investment Proposal

-How I ended up discovering a SolarWinds victim?

-How I ended up with a real-time OSINT and cyber attack attribution campaign on the Conti

Ransomware Gang?

-How I ended up almost retiring and offering OSINT and threat intelligence training?

19.4.16 Exposing the Web's Most Prolific Malvertising Operation Circa 2009 - Exclu-

sive (2023-04-28 16:24)

[1]

Who remembers the 2009's malvertising campaign (**hxxp://trueconv.com**) on the NYTimes and

ESPN including FoxNews at the time which was dropping scareware also known as fake security

software on the hosts of affected users who appear to have clicked an interactive advertise-

ment on some of the Web's most popular web sites at the time part of a rogue and sophisticated

malvertising operation courtesy of Russia-based cybercriminals at the time who were monetiz-

ing the fraudulently obtained and hijacked traffic using a scareware affiliate based network at

the time?

Keep reading.

As I spent some time going through my old threat intelligence archive circa 2009 I found a

crown jewel part of my research at the time which could be easily considered a must process

enrich track down and analyze malvertising operation up to present day where I'll do my best

to assist everyone by sharing as much information regarding the Trueconv.com malvertising

operation at the time including affected parties the actual URLs and domains known to have

been involved in the campaign including related IPs and will do my best to speed up everyone's

work in terms of further processing and analyzing this campaign by using known historical

OSINT processing and enrichment techniques.

[2]

The good question? How I got this data? It's be figuring out a way to access access the publicly

accessible statistics on the primary Trueconv.com malvertising operation domain circa 2009

27213

which leads me to today's analysis of what appears to be the Web's most prolific malvertising

operation on a wide scale circa 2009.

The research in this post can be easily considered the malvertising market segment's largest

OPSEC failure even since it's growth stage back in 2009 where the primary infection vector

here was clien-side exploits and social engineering and where the most affected and targeted

operating system was Windows XP where I'll do my best to offer as much historical and ac-

tionable intelligence on Trueconv.com's true widespread campaigns back in 2009 by offering

a complete listing of all the actual URLs involved in the campaign including the associated

domain names and affected IPs based on publicly obtained back then misconfigured access to

their entire logs database which easily proves to be an invaluable wealth of information on the

most prolific malvertising market segment operation back in 2009.

19.5.3 How Do Cybercriminals Manage Compromised Hosts Using Desktop Manage-

ment Applications? - An Analysis (2023-05-03 19:42)

[1]

27649

If an image is worth a thousand words then check out the following which although released

in 2006 appears to be one of the cybercrime ecosystem's most sophisticated and advanced

compromised hosts management tool within the ecosystem up to present day.

Sample screenshots include:

[2]

27650

Клиент. Команды. (только для уровня admin)

Клиент позволяет отправлять команды ботам и получать результаты их выполнения в реальном времени. Команды могут быть с параметрами и без параметров. Кроме этого есть набор заранее определенных команд, которые начинаются с символа «точка» и доступны через контекстное меню списка ботов (правый клик на списке):

.PING	- отправить эхо-запрос
.RUN	- загрузить и выполнить файл переданный клиентом
.RUN [params]	- допускает так же указание параметров для запускаемого файла
.GET path	- получить файл с бота; path – путь к файлу на боте
.PUT path	- передать файл боту с указанием пути размещения и имени
.DELBOT	- удалить бота и все его следы с машины
.DELBOTPROT	- удалить бота с новозможностью повторной установки

Команды могут отправляться также списку ботов (он. раздел «Списки ботов. Группы»). Яркий пример использования команды: это отправка команды .PING списку ботов. Результат выполнения должен быть через секунду-две в виде ответа CMD_OK в последней колонке списка ботов, которая изменит свой заголовок на Response.

При отправке команд .RUN, .GET, .PUT вручную - необходимо вызвать окно команд, указать после команды необходимые ей параметры и нажать кнопку Send после чего клиент попросит указать локальный файл для отправки если это нужно.

Существует возможность автоматической отправки команд всем новым появляющимся в списке ботам. Для этого служит флаг Auto send this command to new bots

Окно команд хранит также историю отправленных команд, для просмотра предыдущих можно воспользоваться стрелками клавиатуры вверх,вниз либо кнопками в окне. Если команде не предшествует символ «точка», то бот рассматривает строку как http url адрес и пытается загрузить файл с этого адреса и выполнить. После удачного запуска скаченного файла клиент также получит ответ CMD_OK.

После выполнения команды .GET клиент получает целиком файл с бота и открывает диалоговое окно с запросом пути для сохранения принятого файла.

Команда .PUT действует наоборот – файл передается с клиента и просто размещается на боте по указанному пути. После выполнения клиент получает от бота CMD_OK.

.DELBOT запускает режим самоуничтожения бота. Происходит уничтожение записей реестра, сервисов, драйверов, файлов и восстановление точек входа Windows API.

.DELBOTPROT аналогична команде .DELBOT за исключением того, что эта команда модифицирует систему таким образом, что повторная установка бота уже невозможна.

Команда .REBOOT производит немедленную перезагрузку системы.

Поле Note / Response меняется автоматически при приёме ответов команд, вызове окна редактирования комментария, либо вручную – при клике по заголовку столбца.

Клиент. Traffic Expert.

В режиме сокосификации возможен перехват трафика. Для этого служит вкладка **Traffic Expert**. Выделяются следующие виды трафика :

Sended	- трафик, отправленный приложением
Received	- трафик, принятый приложением
GETs	- отправленные запросы страниц (GET команда http)
POSTs	- отправленные наборы данных с использованием команды POST

Над ними числовое значение-длина перехваченных данных; Clear - очистка буфера.
Режимы: HEX- шестнадцатеричный, TEXT - текст, WRAP - текст с переносом строк.

[3]

27651

Клиент. Правила. Закрепление приложения(модуля) за определенным ботон или страной.

Как сказано выше: список активных соединений, позволяет разрывать соединения а также закреплять боты за приложениями.
Это можно сделать, используя **меню соединений**, вызываемое по правой кнопки мыши:
Use module only with this Bot ID - закрепить приложение за ботом
Use module only with this Country - закрепить приложение за страной
Помимо этого возможно ещё и ручное изменение правил соксификации приложений.
Вкладка Modules содержит список правил в формате:
Module - имя приложения (как в стандартном диспетчере задач)
Rule - правило
BotHash - уникальный код бота. (Используется для правил и комментариев)
Countries - список стран через пробел. *Пример:* US CA AU JP MD IN
В процессе работы при перехвате очередного запроса на соединение клиент сначала просматривает список правил. Если выполняющее запрос приложение найдено в поле **Modules**, то клиент находит соответствующего бота и использует его для данного коннекта. Если указанный бот не найден, то в списке соединений возникнет «мёртвый» коннект с **ID**=0, через который трафик не проходит и сетевой доступ приложения фактически блокируется.
При ручном редактировании правил поле **BotHash** содержит подсказку с **ID** бота, которому соответствует указанный хеш. Каждый бот имеет свой уникальный хеш для того чтобы его можно было точно идентифицировать, так как **Bot_ID** существует только на время одной сессии и может быть назначен впоследствии другому боту.

Правила включают в себя два варианта :
Allow only this - разрешить только ...
Allow any, except - разрешить всё, кроме ...

Для создания правила необходимо заполнить поля **Module name**, **Rule** и одно из двух полей: **BotHash** или **Countries list**. Таким образом привязка приложения может осуществляться либо к определенному боту, либо к списку стран. Во втором случае используется случайный выбор с учётом фильтра, если он активен. Наличие в списке активных соединений строк с ID=0 свидетельствует о невозможности выполнить правило соксификации приложения: либо необходимого бота нет в онлайне, либо нет необходимых стран.
При выборе правила из списка его данные попадают в поля для редактирования.
Нажатие кнопки **Add Rule** вызывает добавление правила из полей редактирования в список. **Delete Selected Rule** - удаление выбранного правила, **Delete All Rules** - всех.

При попытке создать новое правило с **Module name** уже существующем в списке правил – выдаётся предупреждение с вопросом о перезаписи.

Одно приложение может иметь только одно правило !

Клиент. Соксификация. RANDon - режим выбора случайного бота. Include/Exclude modules.

Режим соксификации всей системы включается нажатием кнопки **SOCKSIFY**
В данном режиме все создаваемые приложениями TCP-соединения перехватываются клиентом и отображаются в нижнем окне. Поле **ID** содержит номер бота, используемого для данного коннекта. Вверху окна всегда виден текущий активный бот.
Выбор активного бота также можно осуществлять двойным кликом на списке ботов.
Для каждого нового коннекта может использоваться новый или случайный бот.
Режим выбора случайного бота включается и выключается нажатием кнопки **RAND**
В данном режиме создаваемые внешними приложениями соединения будут проходить через случайно выбранного бота из списка, при этом учитывается состояние фильтра, и не отображаемые на экране боты не будут использоваться для соединений.
Нижнее окно показывает список активных соединений

Список активных соединений позволяет разрывать соединения а также закреплять ботов за приложениями.
Это можно сделать, используя **меню соединений**, вызываемое по правой кнопки мыши:

Break this connection	- разорвать выбранное соединение
Break all connections	- разорвать все соединения
Add module to exclude list	- исключить приложение из соксификации
Use module only with this Bot ID	- закрепить приложение за ботом
Use module only with this Country	- закрепить приложение за страной

Для управления правилами привязки ботов к приложениям используется Modules
Вкладка Modules содержит список правил, которые автоматически сохраняются при закрытии клиента и восстанавливаются при запуске. Списки исключений в Settings

В окв закладки Settings находятся два поля:
Include modules - список модулей подлежащих соксификаци
Exclude modules - список исключений. (Имена модулей как в диспетчере задач)

В случае ручного редактирования настроек на закладке Settings необходимо нажать кнопку **Apply** (вверху) чтобы изменения вступили в силу немедленно.

19.5.6 Exposing Hacking Team GhostSec - An Analysis (2023-05-20 12:03)

[1]

In this post I'll profile Hacking Team GhostSec and I'll provide all the relevant and necessary

IoCs (Indicators of Compromise) including all the relevant personally identifiable information

in terms of assisting U.S Law Enforcement and the U.S Intelligence Community on its way to

properly track down and monitor and prosecute the cybercriminals behind these campaigns.

Personal Photos:

19.5.7 Exposing

The

"Denis

Gennadievich

Kulkov"

a.k.a

Kreenjo/Nordex/Nordexin/Try2Check Cybercriminal Enterprise - An Anal-

ysis (2023-05-20 12:04)

[1]

Who would have thought? The U.S Secret Service is currently offering $10M reward for [2]Denis

Gennadievich Kulkov also known as Kreenjo/Nordex/Nordexin who's particularly famous for

running the infamous Try2Check credit card checking cybercriminal enterprise.

What's so special about this individual is the fact that he's also been running a well known

money mule recruitment operation since 2016 using the World Issuer LLC money mule re-

cruitment franchise based on my research using public sources where we've got the actual

hxxp://worldissuer[.]biz domain registered using identical domain registration information such

as for instance hxxp://try2services[.]cm including several other domains such as for instance

hxxp://dam-shipping[.]com and hxxp://cloudnsman[.]org and the following domain which is

hxxp://elementconstructiongroup[.]compan y.

Among the actual domains known to be part of the Try2Check cybercriminals enterprise include:

hxxp://try2services[.]pm

hxxp://try2services[.]cm

hxxp://try2services[.]vc

27668

[3]

including the following domain:

hxxp://just-buy[.]it

including the following two ICQ numbers 855377 and 555724 and let’s don’t forget his personal

email address accounts obtained using public sources which are polkas@bk.ru nordexin@ya.ru

[4]

27669

and it doesn’t get any better than this as we’ve got a pretty good and informative domain port-

folio registered by the same individual based on public information sharing the same domain

registration details such as for instance hxxp://worldissuer[.]biz which actually are:

[5]

hxxp://cloud-mine[.]me

hxxp://gpucloud[.]org

hxxp://hyperhost[.]info

hxxp://miservers[.]info

hxxp://carterdns[.]com

hxxp://reshipping[.]us

hxxp://keyserv[.]org

27670

hxxp://antmining[.]biz

hxxp://investmentauditor[.]com

hxxp://sunnylogistics[.]us

hxxp://try2services[.]cm

hxxp://greatwallhost[.]net

hxxp://jaqjckugrfffqa[.]com

hxxp://numberoneforyou[.]net

hxxp://getprofitnow[.]biz

hxxp://avsdefender[.]com

hxxp://spyware-defender[.]com

hxxp://beta-dns[.]net

hxxp://mpm-profit-method[.]com

hxxp://public-dns[.]us - [6]related including [7]this

hxxp://adobe-update[.]net - Email: krownymaradonna@onionmail.org related domains known

to have been involved in the campaign include - hxxp://amazon-clouds[.]com; hxxp://microsoft-

clouds[.]net; hxxp://telenet-cloud[.]com; hxxp://vmware-update[.]com

hxxp://kwitri[.]net

hxxp://dcm-trade[.]com

hxxp://karoospin[.]biz

hxxp://fastvps[.]biz

19.6 June

19.6.1 The Ransomware "Epidemic" - Or How To Strike Back? (2023-06-02 10:19)

[1]

Not only did we live to see it we're actually living and taking actions one way or another to

see it and yes it's the ransomware "epidemic" that I'm referring to and which I'll try to expose

in this post by not only providing the typical for me technical details and related action and

response initiatives that I've launched in the process but also provide a relevant and in-depth

understanding of the modern concept greatly inspired by a free resources which I came across

to on Twitter today namely - [2]Ransomchats which is outstanding and almost unbelievable

initiative that offers an in-depth peek inside the supposedly secret chat conversations between

ransomware "customer support" and the multi-billion dollar victim which in this case is a reality.

Greatly inspired by the general availability of this free resource I've decided to dig a little

bit deeper inside these publicly accessible of what appears to be proprietary conversations

using a popular tool which I'm using to cluster and produce graphs of current and ongoing

conversations between the bad guys that I come across to and provide my point of view on

a surreal problem that's being fought with the wrong resources and technical means to begin

with and further elaborate and actually share the results of a sample

experiment that I did on

the topic in basically my spare time.

Sample graphs based on the recently released communication courtesy of the Ransomchats

project:

19.6.2 A Brief Overview of U.S Cyber Command's Global Cyberspace Operations Syn-

chronization (GCOS) Concept - Or Can We Make The Difference Between Real-

Time and Synchronization in Cyberspace? (2023-06-02 10:21)

[1]

It should be clearly said that the current state of the U.S Cyber Command's overall Global

Cyberspace Operations Synchronization (GCOS) Concept is fairly naïve and a bit childish in

the context of what I can best describe as real-time cyberspace operations where the primary

difference between synchronization and real-time can be best described like Feedburner vs

OSINT as a concept where Feedburner despite being a well known product and a service is

basically delivering its content and features using synchronization compared to other modern

approaches given the fact that they can be achieved such as for instance real-time cyberspace

operations where the ultimate goal would be to achieve the unachievable namely the use of

real-time cyberspace operations compared to marely synchronizing them to achieve something

that I won't really elaborate on such as for instance the surreal synchronization of U.S Cyber

Command cyberspace operations compared to real-time cyberspace operations.

Real-time communications have to do with pushing the very boundaries of an individual or an

organization sticking to common good where in most of the cases the common good can get

someone in trouble.

I'll now proceed and give you a pretty decent of something that I'm unknowingly extremely

good at and a process and a concept excluding the fact that it's not a process at all in case you

27685

can't or don't really know or bother to implement it but rather remains a bit of a commercial and

a bit of a sophisticated practice known as military and cyberspace deception and cladestine

and special cyber operations type of activity where the ultimate goal would be to eventually

make people and folks laugh one way or another based on what can

be truly achieved here.

Let’s take a moment and give you a brief example on the process. Military and cyberspace

deception and clandestine and special cyber operations activity as a concept has been around

since the early days where I originally began preaching on the use of "People’s Information

Warfare" by Chinese hacktivists where the ultimate goal would be to crowdsource the actual

bandwidth for a particular campaign to the massess and actually to sometimes unaware end

users and organizations which believe it or not takes and it better doesn’t to another direct

namely the MakeLoveNotSpam project initiative dating back to 2004.

"Setting the globe" based type of scenario is a bit childish explanation of what global segments

of synchronization really means compared to real-time cyberspace operations and what should

be really considered here is the true nature of what real time really means in the global context

of cyberspace operations.

19.6.3 Assessing the Current State of Cyber and Cyber Military Deception Concepts

Online - Part One (2023-06-02 13:30)

[1]

27686

The overall state of today's modern cyber deception and cyber military deception online has

to do with a maze of sophisticated and advanced asset camouflaging activities including a

basically a state of overall cyber dominance and cyber power in the context of systematic

professional and sophisticated control and distribution of information locally including interna-

tionally in the context of having others not just perceive but actually do something provoked

or prompted by a sophisticated information campaign distributed in a classified or secret way.

The primary purpose behind coming up with this post is to shed more

light into my understand-

ing of the overall concept and to actually demonstrate and give relevant examples from the

field.

Misperception:

Among the few basic concepts for starters in the field of cyber and military cyber deception

27687

next to information operations has to do with misperception where the very bottom of a specific

concept is basically twisted to the point of having others do things and make impact in the

information camping without really perceiving the true state of the process where others will

eventually benefit from what you're initially prone to believe and will even greatly benefit from

what you're actually about to do based on the specific information operation.

Surprise

A closely kept secret and an information operation is everyone's surprise at a later stage when

the actual implementation phase or actual maturity if any phase and finally the actual launch

of the information operation takes place leading it to become everyone's surprise.

Deception

The very basics of cyber and cyber military deception has to do with a very but closely kept

secret word and a phase where the ultimate reality is that this is a process known as on pur-

posely or indirectly both consciously or on purpose making others think act upon or actually

believe to a certain extend and take action basically the process known as a twisted reality.

Deliberate misleading

The process has to do with either attempting to trick or entice an individual or an organization

into heading in the opposite direction or coming up with a process that can either sort of impose

costs to its current upcoming and emerging both real life and cyber operations.

False represenation of environment

This is a relatively sophisticated process both in real life and in cyberspace that could ultimately

lead to an utopian world or everyone's dream come true reality where we could have entire

cyber populations both malicious and not malicious act think train and even educate them-

selves based on a wrongly perceived reality where the ultimate goal would be for someone to

basically manage a cyber deception and cyber military deception information operation where

the ultimate goal would be to launch and actually monitor its process throughout the decade.

Everything that's seen can be actually hidden

This is a relatively advanced and sophisticated approach that entices users and organizations

into living in the other side of the world where the ultimate goal would be to portray a situation

or a specific information operation where the ultimate goal would be to entice people and

organizations into taking action based on the information operation.

Everything's that's ready is actually unready

This is a similar approach that could take into consideration the timelines of events and an

individual's or an organization's development cycle for a specific purpose where the ultimate

goal would be to launch an information operation.

19.6.4 Dancho Danchev's OSINT and Threat Intelligence Training Video Demonstra-

tion in Bulgarian - Part Two (2023-06-04 06:12)

[1]

I’ve decided to share with everyone a recently released YouTube video demonstration in Bul-

garian on the topic of OSINT and threat intelligence training.

Here’s a sample Table of Contents for the OSINT and the Threat Intelligence training in Bulgar-

ian:

Кой се интересува от индивидуално или групово обучение в сферата на OS-

INT анализ и превенция на кибер престъпления и анализ и обработка на кибер

атаки известен още като практиката Threat Intelligence?

Примерния курс за OSINT обучение които предлагам включва:

• Достигане до Източника на Кибер Атаката По Време на Анализа на Информация с

Публични Източници

• Използване на Разузнаване на Информация с Публични Източници в анализа на кибер

атаки

• Използване на Разузнаване на Информация с Публични Източници в борбата с

престъпленията

• Кои е Данчо Данчев?

• Кои са някой от текущите ми и бъдещи проекти в сферата?

• Обогатяване на информацията по време на Анализа на Информация с Публични

Източници

• Основи на Разузнаването с Публични Източници на Информация

• Практическа Демонстрация на Анализ на Информация с Публични Източници

• Практически Примери на Анализ на Информация с Публични Източници

• Практически съвети по време на Анализа на Информация с Публични Източници

• Представяне на Курса

• Събиране на Техническа Информация по време на Анализа на Информация с Публични

Източници за Напреднали

• Събиране на Техническа Информация по време на Анализа на Информация с Публични

Източници за Начинаещи

• Тактики и Методологии за Начинаещи

• Тактики и Метотодологии за Напреднали

• Текущо състояние на пазара за продукти и услуги свързани с Разузнаване на

аИнформация с Публични Източници на Информация

• Финален Изпит и Въпроси

Пример курс по threat intelligence който предлагам включва:

• Борба с киберпрестъпността в контекста на използване на информация за заплахи

• Бъдещето на разузнаването на заплахи

• Усъвършенствани практики за разузнаване на заплахи Концепции и методологии -

Практически пример

• Въведение

• Как да използвате публични и собствени бази данни за разузнаване на заплахи

за кампании за приписване на участници в кибернетични заплахи, включително

кръстосани препратки и кръстосана проверка

27690

• Как да обогатите IoC за цялата си компания (индикатори за

компрометиране) с

помощта на публични и собствени източници и да свържете точките при голяма

кибератака и кампания за актьор в кибернетична заплаха

• Използване на OSINT в контекста на събиране на информация за заплахи

• Изследване на киберпрестъпления и разузнаване на заплахи IoC (индикатор за

компромис) Обогатяване в контекста на използване на OSINT

• Практиката за борба с киберпрестъпленията чрез разузнаване на заплахи

• Концепции за разузнаване на заплахи за начинаещи

• Методологии за проактивно разузнаване на заплахи

• Методологии за разузнаване на заплахи

• Обогатяване на информация за заплахи в контекста на използване на OSINT

• Как да превърнете вашите клиенти в пасивни и активни разпределени сензори за

събиране на информация за заплахи?

• Основи на разузнаването на заплахи

• Разширено функциониране и поддържане на програма за разузнаване на заплахи в

цялата компания за напреднали потребители

• Практически съвети за разузнаване на заплахи

• Основите на започването на разузнаване на заплахи за начинаещи

• Разузнаване на заплахи в контекста на кибератака.

• Разузнаване на заплахите в контекста на използване на

техническо събиране за атаки

с приписване на актьор на кибернетична заплаха

• Разширени концепции за разузнаване на заплахи

• Как да преобразувате крайните точки на служителите на вашата компания в

разпределен сензор за събиране на информация за пасивни и активни разузнавания

за заплахи?

• Текущо състояние на екосистемата за разузнаване на заплахи

• Текущо състояние на пазара за разузнаване на заплахи

• Наистина ли работи методологията „Агрегиране и забравяне“ в областта на

разузнаването на заплахи?

• Основите на стартирането, поддържането и управлението на програма за разузнаване

на заплахи в цялата компания за начинаещи

• Как да обучите вашите анализатори за разузнаване на заплахи да бъдат рок звезди

на индустрията за сигурност и аналитичните и технически рок звезди?

Sample video demonstration of Dancho Danchev’s OSINT and Threat Intelligence training in

Bulgarian:

27691

In case you're interested in inquiring about individual or group OSINT or threat intelligence

training for you or for your team feel free to drop me a line at dancho.danchev@hush.com
